# Alw distribution box dimensions

## Overview

This document provides specifications for various distribution boxes including dimensions, mounting sizes, and number of ways.

## Key Takeaways

ALW distribution boxes typically have compact, modular dimensions designed for efficient cable management, with sizes varying by model and capacity.Typical Dimensions

ALW distribution boxes are designed to accommodate multiple cable entries and terminations while maintaining a compact footprint. While exact dimensions depend on the specific model, typical ranges are:

• Length: 300 mm to 600 mm

• Width: 200 mm to 400 mm

• Height/Depth: 100 mm to 250 mm These enclosures are often made from robust ABS or industrial-strength plastic, suitable for indoor and outdoor use, and may include features like lockable lids, integrated cable entry points, and bend radius protection for fiber management ( ).
Features Affecting Dimensions
• Number of ways or ports: Boxes can range from 1-way to 36-ways, with larger boxes increasing in size to accommodate more connections ( ).

• Mounting options: Wall-mounted or freestanding models may include additional space for mounting brackets or rails ( ).

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• Cable entry and exit points: Standard boxes provide multiple exit points for patching cables and a main entry point for loose tube, tight buffer, pre-terminated, or armored cables ( ).

• IP rating: Many ALW boxes are rated IP54 or higher, which can slightly increase enclosure thickness to ensure dust and water protection ( ).
Practical Considerations

When selecting an ALW distribution box, consider:

• Available installation space to ensure the box fits without obstructing other equipment.

• Cable management needs, including bend radius and number of fibers or conductors.

• Environmental conditions, such as exposure to moisture or dust, which may require a larger or more robust enclosure.

• Future expansion, as boxes with modular designs allow adding adapters or additional ports without replacing the entire enclosure. For precise dimensions of a specific ALW distribution box model, it is recommended to consult the manufacturer's datasheet or catalogue, which provides exact length, width, height, and mounting specifications ( ).
