

100g Optical Module CFP

Overview

A CFP optical module is a high-speed pluggable transceiver used in fiber optic communication systems to enable 100 Gigabit Ethernet (100G) data transmission over optical fiber. This MSA was mainly designed for 100 Gigabit Ethernet systems and the "C" in "CFP" means the Latin letter C. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. The CFP module is a hot-pluggable form factor designed for optical networking applications. CFP is an acronym for 100G (C = 100 in Roman numerals; Centum) Form factor Pluggable.
