

120km optical module communication

Overview

The 120km SFP optical module has emerged as a cornerstone technology for these requirements, enabling high-performance connectivity across significant geographic spans without the need for costly intermediate amplification or repeaters. Whether supporting metropolitan area networks (MANs) or remote. SFP 155M 120km is a series of SFP with speed rate up to 155Mbps and transmission distance up to 120km. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. They are indispensable in many. GAOTek 10G BiDi 120KM SFP+ Singlemode Transceiver is a small form factor pluggable module designed for long-distance optical communication in applications such as 10G Ethernet and telecom networks.
