Correct Price for Sealing Distribution Boxes

Overview

Order additional seals here! This Polylok 6" Seal is designed for us with Polylok Boxes #3017-206 & #3017-207.

Key Takeaways

Standard sealing for distribution boxes typically ranges from $5 to $50 per seal, depending on type, size, and material.Types of Seals
• Pipe Seals (Polylok)
• Designed to create a watertight connection between pipes and distribution boxes.

• Available for 2", 3", 4", and 6" pipe sizes.

• Can be cut to size for custom applications .

• These seals are generally affordable, often in the range of $5–$15 per seal, depending on size and supplier.

• Foam Gaskets (Polyurethane or Silicone)
• Used for sealing the grooves of plastic or metal distribution boxes.

• Applied via CNC-controlled dosing machines for precision and compliance with IP/NEMA standards .

• Polyurethane foam (FERMAPOR K31) and silicone foam (FERMASIL) provide high resilience (>95–97%) and long-term sealing performance .

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• Pricing for these high-precision foam gaskets is higher, typically $20–$50 per box, depending on box size, complexity, and whether automated application is used.

Factors Affecting Price
• Material: Silicone foams are generally more expensive than polyurethane due to higher temperature resistance and durability.

• Box Size: Larger distribution boxes require more sealant material, increasing cost.

• Application Method: Pre-cut pipe seals are cheaper than custom CNC-applied foam gaskets.

• Environmental Requirements: Outdoor or harsh-environment boxes may require higher-grade seals, slightly increasing cost .
Summary

For standard distribution boxes:

• Small pipe seals: $5–$15 each

• Foam gaskets for larger boxes: $20–$50 per box These prices are indicative and may vary by supplier, region, and specific technical requirements. For exact pricing, contacting suppliers like Polylok or Sonderhoff with box specifications is recommended .
