

8 Price of Outdoor Single-Mode Fiber Optic Cable

Overview

Buyers typically pay a range for fiber optic cable per foot depending on fiber type, jacket, and shielding, plus installation considerations.

Key Takeaways

An 8-core outdoor single-mode fiber optic cable typically costs between \$0.50 and \$3.00 per foot, depending on construction, armor, and environmental rating.

Pricing Overview

The cost of single-mode fiber optic cables varies based on fiber count, construction type, and environmental suitability. For an 8-core outdoor cable: Standard single-mode cable: \$0.10 to \$0.

50 per foot for the cable itself, with higher counts or specialized construction increasing the price proportionally. Armored or self-supporting outdoor cables: \$0.50 to \$3.

00 per foot, reflecting additional protection against moisture, crush, and UV exposure. Bulk purchases: Prices may be lower per foot (\$2.00–\$7.

00 per foot for bulk single-mode cables), while pre-terminated or factory-assembled cables cost more. Example: 8-Core GYTC8S Figure-8 Cable The 8-core GYTC8S figure-8 cable is a typical self-supporting outdoor single-mode cable with loose-tube construction, steel-wire strength members, and a PE sheath for aerial or duct installation. Its design provides moisture resistance, crush resistance, and tensile strength, making it suitable for harsh outdoor environments.

Pricing for this type of cable generally falls within the \$0.50–\$3.00 per foot range, depending on supplier and order quantity.

Factors Affecting Cost

Cable Construction: Armored, self-supporting, or direct-burial cables cost more than standard outdoor cables. **Environmental Rating:** UV-resistant PE jackets and water-blocking materials increase durability and price. **Installation Method:** Aerial, duct, or underground installation may influence the total project cost, though material cost per foot remains similar.

Bulk vs. Retail: Wholesale bulk purchases reduce per-foot cost, while pre-terminated assemblies or retail purchases are more expensive.

Summary

For an 8-core outdoor single-mode fiber optic cable, expect a material cost of approximately \$0.50 to \$3.00 per foot, with armored or self-supporting designs at the higher end.

Bulk orders can reduce costs, while pre-terminated or specialized cables may exceed this range. Always consider environmental and installation requirements when budgeting for outdoor fiber deployments.
