

AB type lighting distribution box

Overview

General Electric AB64B A-Series™ II Panelboard Box, General Electric AB64B A-Series™ II Panelboard Box, 64-1/2 in H x 20 in W x 5 AB49B | Pro-Stock Lightin.

Key Takeaways

An AB type lighting distribution box is a modular electrical enclosure designed to safely distribute power to lighting circuits, typically made from flame-retardant ABS or UV-resistant materials.

AB type lighting distribution boxes, also referred to as ABS or ABC distribution boxes, are used to manage and distribute electrical power to multiple lighting circuits in residential, commercial, or industrial settings. They are modular in design, allowing flexibility in configuration and easy installation of incoming and outgoing devices such as MCBs, MCCBs, RCDs, and busbars.

Construction and Materials

- **Material:** Most AB type boxes are made from ABS flame-proof plastic (UL V-0 rated) or UV-resistant materials for outdoor applications.
- **Safety Features:** They provide excellent insulation, flame resistance, and impulse protection, and often include shrouded busbars and terminals to prevent accidental contact.
- **Modularity:** The boxes are designed to accommodate various sizes and numbers of modules, typically ranging from 8 to 46 modules, with adjustable mounting studs and removable gland plates for easy wiring.

Electrical Specifications

- **Rated Voltage:** Commonly 220V/380V AC, 50Hz.

- **Current Rating:** Depending on the model, AB type boxes can handle single-phase or three-phase systems, with capacities up to 200A for ABC distribution boxes .

- **Protection:** Internal protection can include MCBs, RCDs, and MCCBs, and the enclosures often meet standards such as BS EN60439-3 and JB/T7121-93 .

Applications

- **Residential and Commercial:** Used for distributing lighting circuits in homes, offices, and commercial buildings .

- **Industrial and Event Use:** Some AB type boxes are designed for film, media, and event lighting, providing flexible and rapid deployment .

- **Outdoor/Utility:** ABC distribution boxes are suitable for pole or wall mounting, handling multiple service cables in aerial bundled conductor systems .

Advantages

- **Flexible Configuration:** Modular design allows easy addition or replacement of circuits.

- **Safety:** Flame-proof and insulated materials reduce fire and electrical hazards.

- **Ease of Installation:** Removable panels, adjustable studs, and pre-fitted incoming kits simplify setup.

- **Durability:** UV-resistant and robust construction ensures long-term reliability in outdoor or harsh environments . AB type lighting distribution boxes are therefore a versatile and safe solution for managing lighting circuits across a wide range of applications, combining modularity, safety, and ease of installation.
