

ABB distribution box for household high-voltage electricity

Overview

Depending on your specific application, our range of sub distribution boards includes solutions with mounting plates and DIN-rails with generous wiring space on both sides and behind the DIN rails.

Key Takeaways

ABB distribution boxes provide safe, modular, and reliable solutions for residential high-voltage electrical systems, supporting both surface and flush mounting with robust protection features. OverviewABB offers a wide range of distribution boxes and switchboards designed for residential and general use, capable of handling high-voltage household circuits safely and efficiently. These enclosures are engineered to protect against overloads, short circuits, ground faults, and arc faults, while also allowing monitoring of electricity consumption.

They are suitable for single-phase and three-phase systems, depending on the household power requirements.

Key Features

Modular Design: ABB distribution boxes come in modular configurations, supporting multiple circuit breakers (e.g., 4, 8, 12, 16, 24, or more modules) with transparent or metal doors for easy inspection. **Material and Durability:** Boxes are made from fireproof plastic or steel, providing stability, waterproofing, and resistance to mechanical impacts, dust, and moisture. **Installation Options:** Available for surface mounting or flush installation, making them adaptable to different household layouts.

Safety and Compliance: Integrated DIN rails and compatibility with ABB miniature circuit breakers (MCBs) ensure reliable overload and short-circuit protection. **Ease of Use:** Clear labeling, quick installation, and user-friendly design simplify electrical management in homes and apartments.

Applications

Residential Homes and Apartments: Compact indoor panels manage multiple circuits safely, ideal for apartments or small houses. **Small Offices and Workshops:** Wall-mounted boxes provide easy access and integration into existing walls, supporting moderate high-voltage loads.

Industrial or High-

Capacity Residential Systems: Floor-mounted or larger distribution boards can handle extensive power networks, including multiple feeders and busbar systems.

Popular AB

B Models
BEF402216: Surface-mounted, 16 circuit breakers, transparent door, fireproof body.
BEF402224: Surface-mounted, 24 circuit breakers, transparent door, suitable for residential and general use.
U52: Flush-mounted, 120 circuit breakers, metal door, fireproof steel body, suitable for high-capacity residential or small industrial applications.

BEF402204: Plastic indoor panel for 4 modules, transparent door, ideal for apartment switchboards.
Conclusion
ABB distribution boxes are versatile, safe, and reliable solutions for household high-voltage electrical installations. Their modularity, robust protection, and flexible installation options make them suitable for a wide range of residential applications, from small apartments to larger homes requiring multiple circuits and high-capacity power management.
