Good ladder-shaped cable trays in the UK

Overview

All our Cables Trays, Cable ladders and Uni-Strut profiles can be supplied in various sizes, resin systems and fire ratings.

Key Takeaways

Ladder-type cable trays are widely available in the UK from suppliers like RS Components, Channel and Tray, Eaton, Metsec, and CMW, offering various sizes, materials, and delivery options.Key Suppliers and Options

RS Components offers a broad range of cable trays, including ladder-type designs with horizontal rungs for easy cable support and maintenance. They provide options in stainless steel, electrogalvanised steel, hot-dip galvanised steel, and PVC, with fast delivery and technical support available . Channel and Tray supplies ladder cable trays in widths of 150mm, 300mm, and 450mm, suitable for light to medium cable loads in industrial and commercial settings. Materials include steel, aluminium, and fiberglass, with rungs spaced typically 300–400mm apart . Eaton provides the B-Line series of cable management solutions, including metallic and non-metallic ladder trays. They offer extensive CAD/BIM resources for design and installation, supporting both commercial and industrial applications . Metsec offers complete ladder systems ranging from 50mm light-duty to 150mm extra heavy-duty ladders, with widths up to 900mm. Materials include mild steel (hot-dip galvanised), pre-galvanised steel, and stainless steel 316L, and they provide a full design service, CAD drawings, and made-to-order options . CMW is a leading UK provider of Pemsa cable ladder racks and trays, offering high-quality products with next-day delivery and free delivery on orders over £100. They cater to commercial and industrial electrical installations and provide expert support for project planning .

Considerations When Choosing Ladder Cable Trays
• Material: Choose based on environmental conditions (e.g., stainless steel for corrosion resistance, PVC for impact and weather resistance).

• Width and Load Capacity: Select ladder width according to cable volume and weight. Common widths are 150mm, 300mm, 450mm, and up to 900mm for heavy-duty applications.

• Compliance: Ensure trays conform to BS EN 61537 standards for cable management systems.

• Accessories: Check for availability of splice plates, bolts, and other installation hardware.

• Support and Design Tools: Suppliers like Eaton and Metsec provide CAD/BIM files for planning and installation efficiency. These suppliers provide both in-stock items for immediate delivery and custom solutions for larger or specialized projects, making it straightforward to source ladder-type cable trays across the UK.
