Honduras Level 3 Temporary Power Distribution Box

Overview

Portable Power Distribution Designed for durability in tough environments, these transportable distribution units make it easy to control and deliver power.

Key Takeaways

A Level 3 Temporary Power Distribution Box in Honduras is a portable, rugged PDU designed for safe, flexible, and compliant temporary power distribution in industrial, construction, or event settings.

Overview

Temporary power distribution boxes, also known as portable PDUs or spider boxes, are engineered to safely distribute electrical power in temporary setups such as construction sites, outdoor events, or industrial projects. In Honduras, these units are available in configurations that meet local standards and agency approvals, ensuring compliance and safety for both standard and industrial applications.

Key Features

Amperage and Voltage Ratings: Units typically range from 20A to 800A, with single-phase or three-phase options, and adjustable circuit breakers to match specific load requirements. Environmental Protection: Many boxes feature NEMA 3R ratings, making them weather-resistant and suitable for outdoor use, protecting against rain, sleet, snow, and ice formation. Indoor units may have NEMA 1 ratings for protection against dust and accidental contact.

Portability and Durability: Designed for easy transport and setup, these boxes often include handles, elevated bases, or compact designs for tight spaces. Enclosures can be rubber or heavy-duty metal, resistant to rust, corrosion, and mechanical impacts. Multiple Outlets: Temporary PDUs provide multiple receptacles, including straight blade and locking styles, to power a variety of equipment simultaneously.

Compliance and Safety: Units are typically UL/cULus listed and built to meet NEC standards, ensuring safe operation in demanding environments.

Applications in Honduras

Construction Sites: Powering tools, lighting, and temporary equipment. Events and Entertainment: Outdoor concerts, festivals, and temporary installations. Industrial and Data Centers: Rack-mounted or surface-mount PDUs for temporary server or equipment setups.

Examples of Available Units

Spider Boxes: Rugged, portable units with multiple outlets and 3-phase options, ideal for outdoor or construction use. Load Master™ Series: Adjustable output ratings, compact design, and durable enclosures for dynamic temporary applications.

Honduras-

Compliant PD

Us: Surface-mount or rack-mount units designed to meet local electrical standards, suitable for both standard and industrial duty.

Considerations

When selecting a Level 3 temporary power distribution box in Honduras, consider: Load Requirements: Match amperage and voltage to your equipment. Environmental Conditions: Choose NEMA 3R for outdoor use or NEMA 1 for indoor setups. Portability Needs: Ensure the unit can be easily moved and installed in your workspace.

Compliance: Verify local approvals and UL/NEC certifications for safety.

These PD

Us provide a reliable, flexible, and safe solution for temporary power distribution in Honduras, supporting a wide range of industrial, construction, and event applications.
