• Control: Stepless fan speed control via Triac-based controller; pressure-independent primary VAV damper control .

• Noise Levels: Designed for low room noise; NR35 achievable in occupied zones .

• Energy Efficiency: Utilizes warm air from the building to reduce energy consumption .

• Motor Specs: 230V, 50Hz single-phase, auto-reset thermal overloads, permanently lubricated bearings .

MAICO MF-BV Sheet Metal Air Distributor Box

• Construction: Sheet metal with multiple nominal sizes (63x8, 63x14, 75x6, 75x12, 90x5), .

• Variants: 5 size options to match different duct systems .

• Customization: Allows selection and comparison of variants for specific airflow requirements .

General Considerations

• Airflow Control: Most distribution box fans include internal restrictors or dampers to balance airflow across multiple outlets.

• Noise Management: Low-noise designs are common, with NR ratings provided for ductborne and case-radiated sound.

• Motor Types: Direct drive, permanent split capacitor motors are standard, often compatible with fan speed controllers.

• Installation Flexibility: Ceiling, wall, or floor mounting is typical; compact designs suit small spaces.

• Energy Efficiency: Many models utilize existing warm air or optimize fan operation to reduce energy consumption. Distribution box fans are essential for efficient, quiet, and controllable air distribution in residential, commercial, and industrial ventilation systems, with specifications varying by model to suit airflow, duct size, and installation requirements .
