

Aluminum Alloy Explosion-proof Distribution Box Housing

Overview

Explosion-Proof Distribution Box The distribution box (explosion-proof) is an aluminum alloy housing, electrostatic spraying, in accordance with the explos.

Key Takeaways

Aluminum alloy explosion-proof distribution boxes are designed for safe electrical distribution in hazardous environments, featuring die-cast aluminum housings, modular layouts, and high-grade sealing systems.

Key Features

Material and Construction: These boxes are typically made from die-cast aluminum alloy, providing corrosion resistance, durability, and excellent heat conduction. Some models also offer stainless steel or carbon steel options with high-pressure powder coating or brushed finishes for enhanced anti-corrosion performance. Exposed fasteners are often stainless steel to prevent corrosion.

Explosion-

Proof Design: The housings comply with IEC explosion-proof standards, commonly classified as Exd (flameproof), Exi (intrinsically safe), or Exm (restricted sparking). The main chamber usually employs a flanged explosion-proof design, while wiring chambers may use increased safety measures to prevent sparks or high-temperature gases from escaping. **Sealing and Protection:** Advanced sealing systems, such as labyrinth structures and high-temperature silicone rubber strips, ensure dust-proof, moisture-proof, and corrosion-resistant performance.

Some models use one-step molded foam casting technology for superior protection. Modular and Flexible Layout: Many aluminum alloy boxes support modular assembly, allowing flexible combination of circuits and easy integration of components like circuit breakers, AC contactors, thermal relays, surge protectors, meters, and pushbuttons. Terminal blocks and rail-mounted components reduce loosening risks and improve structured wiring.

Thermal Management and Safety: Metal housings enhance heat dissipation, supporting compliance with industrial temperature groups (T1–T6). Grounding terminals and natural conductivity reduce static accumulation and discharge risks in explosive environments. Installation and Customization: Wall-mounted or column-mounted designs save space and allow flexible installation.

Outdoor models can include rain covers or protective enclosures, and switch handles can be customized with metal or padlocks for safety. Modular expansion supports system upgrades and distributed junction networks.

Applications

Aluminum alloy explosion-proof distribution boxes are widely used in industrial automation, petrochemical plants, outdoor electrical installations, and hazardous areas where flammable gases, dust, or sparks may occur. They ensure safe power distribution, isolation, and control in explosive-prone environments. Popular ModelsBX51 Series: Features flanged explosion-proof main chamber, modular assembly, and optional color-coded switch panels.

YXF

B Series: Offers labyrinth sealing, high-temperature silicone strips, and structured terminal block wiring for industrial automation and petrochemical systems.

Wall-

Mounted Distribution Boxes: Flexible installation, customizable materials, and compliance with Exd, Exi, or Exm standards. These models provide a balance of safety, durability, and flexibility, making them suitable for a wide range of hazardous electrical applications.

Explosion-Proof Distribution Box

The distribution box (explosion-proof) is an aluminum alloy housing, electrostatic spraying, in accordance with the explosion-proof provisions of GB3836.2-2000, for the distribution of electric

Ex Enclosure Systems

ROSE supplies flameproof enclosures in various sizes and types for use in various gas groups and service-temperature ranges. The classic: The aluminium housing

European Explosion-Proof Enclosures | EX Industries

Designed for use in hazardous environments classified as Zone 1, 2 (Gas) and Zone 21, 22 (Dust). Engineered with high-quality low-copper aluminium alloy, these

HRMD91 Explosion proof Distribution Box (Ex d IIB+H2)

Copper-free aluminium enclosure, powder coated surface. Equipped with a specialized hinge structure which can prevent damage to the flameproof joints

Aluminum Alloy Explosion-Proof Box

The Aluminum Alloy Explosion-Proof Box adopts die-cast aluminum alloy housing with a labyrinth sealing structure. The sealing strip uses high-temperature resistant silicone rubber to improve dust

BXM (D) Explosion proof electrical ap

Feature of product The shell is made of aluminum alloy die-casting with high-voltage electrostatic spraying on the surface, which is corrosion-resistant and anti-aging; This series of products are of

Explosion-proof junction box, Explosion-proof terminal

Find your explosion-proof junction box easily amongst the 40 products from the leading brands (STAHL, 4B Braime Components, KROMA MEC, ...) on

Explosion proof Distribution Boxes HLDP03-M Malaysia

Explosion proof Distribution Boxes HLDP03-M Malaysia Zone 1 and Zone 2 Zone 21 and Zone 22 Meet the necessities in the following industries, such as petroleum,

Explosion Proof Junction Box Types, Prices

Learn about explosion proof junction boxes—pricing, sizes, certifications, and installation tips for electricians and engineers. Shop certified

Ex d Junction Box Aluminium EJB-A | Supermec

EJB A series Ex d enclosures are normally used in the chemical and petrochemical plants, offshore platforms, refineries and any other industry where hazardous atmospheres (gas and combustible

polish-non-standard-explosion-proof-lighting-distribution-box

All Companies and suppliers for polish-non-standard-explosion-proof-lighting-distribution-box Find wholesalers and contact them directly Leading B2B marketplace Find companies now!

Palau steel plate explosion proof distribution box ...

All Companies and suppliers for palau-steel-plate-explosion-proof-distribution-box-equipment Find wholesalers and contact them directly Leading B2B marketplace Find companies now!
