How much does a ton of construction site electrical distribution boxes cost

Overview

Rent Power Distribution Equipment Get these exclusive online rates by renting through our website or app. For our full list of power distribution equipment.

Key Takeaways

The cost of construction site electrical distribution boxes varies widely, typically ranging from $500 to $3,000 per ton depending on material, size, and features.Pricing Overview

Construction site electrical distribution boxes, also called electrical enclosures or panels, are priced based on material, amperage capacity, number of circuits, and protective features. Basic plastic or small metal boxes can cost as little as $10–$50 per unit, while larger, weatherproof, or high-capacity metal enclosures can reach several hundred dollars each . Premium industrial-grade units with surge protection, modular designs, or smart monitoring can cost even more .

Estimating Cost Per Ton
• Weight Consideration: A typical medium-sized metal distribution box weighs between 50–150 pounds (0.025–0.075 tons). Larger industrial enclosures can weigh 500 pounds (0.25 tons) or more .

• Unit Price to Ton Conversion: If a 500-pound (0.25-ton) metal box costs $750, the cost per ton would be approximately $3,000. Smaller boxes with lower weight and cost reduce the per-ton price proportionally.

• Material Impact: Steel enclosures are heavier and more expensive than plastic, increasing the per-ton cost. Outdoor or weatherproof boxes also add to the price due to reinforced construction and coatings .
Additional Factors Affecting Cost
• Installation and Labor: On-site installation can significantly increase total project cost, sometimes exceeding the box price itself .

• Regional Variations: Prices fluctuate based on local labor rates, shipping, and raw material costs .

• Bulk Purchases: Buying multiple units for a large construction site may reduce the per-ton cost due to economies of scale.

• Compliance and Safety Features: Boxes meeting higher safety standards or including surge protection and modular expansion options are more expensive .
Practical Guidance

For budgeting purposes, expect a range of $500–$3,000 per ton for construction site electrical distribution boxes, with the lower end representing lightweight, basic units and the higher end representing heavy-duty, industrial-grade enclosures. Always consider material, amperage, weatherproofing, and installation requirements when estimating total project costs.
