Mauritius Electrical Distribution Box

Overview

Distribution Boxes in Mauritius | Breaker Enclosures – Shop high-quality distribution boxes and enclosures for circuit breakers at Electrical.mu. Designed.

Key Takeaways

In Mauritius, standard electrical distribution boxes are modular enclosures designed for residential, commercial, and industrial installations, typically accommodating 4 to 72 modules with surface or flush mounting options.

Types and Brands

Legrand Practibox S is a widely used surface-mounted cabinet available in Mauritius, offering 1 row with 4 to 72 modules per row, equipped with earth terminal blocks and a smoked door for safety and visibility. It is suitable for indoor installations and comes with a 2-year warranty. Hager Flush Mounting Enclosures are another common option, designed for flush installation with opaque doors.

They are compatible with DIN rail mounting and available in module capacities ranging from 12 to 72 modules. These enclosures are made of durable plastic, typically in RAL 9010 pure white, and feature latch-type doors that can be interlocked. Easy9 Surface Enclosures are modular plastic enclosures with 18 modules per row, designed for indoor use and compatible with various modular switchgear.

Key Features

Module Capacity: 4 to 72 modules depending on the model and installation type. Mounting Options: Surface-mounted (Practibox S, Easy9) or flush-mounted (Hager). Material: High-quality plastic for durability and safety.

Safety Features: Earth terminal blocks, interlockable doors, and compliance with local electrical standards. Design: Modern, streamlined design suitable for residential and commercial environments.

Regulatory Considerations

Distribution boxes in Mauritius must comply with the Electricity Act 2005 and associated regulations, ensuring safe installation and operation. Only certified enclosures should be used, and installation should follow local electrical codes to prevent hazards.

Applications

Residential: Small to medium-sized homes, typically 12–24 modules. Commercial: Offices and shops, 24–48 modules. Industrial: Large facilities requiring 48–72 modules for complex electrical setups.

These distribution boxes provide a safe and organized way to house circuit breakers, switches, and other electrical components, ensuring reliable power distribution and protection for electrical systems in Mauritius.
