How much does optical fiber cable cost in centralized procurement

Overview

After analyzing 40+ U.S. fiber projects, we''ve assembled current material rates, labor burdens, and hidden fees.

Key Takeaways

In centralized procurement, optical fiber cable costs vary widely, with bulk prices typically ranging from $0.05 to $6 per foot depending on cable type, fiber count, and specifications, while large-scale tenders like China Mobile's set total bid limits in the billions of RMB.General Pricing for Bulk Fiber Optic Cable

The cost of fiber optic cables in bulk or centralized procurement depends on several factors:

• Cable Type and Fiber Count: Single-mode (OS2) cables are generally cheaper than multimode (OM3/OM4), while higher fiber counts (e.g., 288-core) increase the price significantly. Simple indoor cables may cost $0.05–$0.30 per meter, whereas armored or high-count outdoor cables can reach $1.50–$6 per foot ($0.46–$5.50 per meter) depending on specifications and environmental ratings .

• Construction and Jacket Material: Armored cables, LSZH jackets, or UV-resistant outdoor cables add 20–50% to the base cost due to enhanced protection and compliance requirements .

• Pre-Terminated vs. Raw Cable: Pre-terminated cables reduce installation labor but increase material costs by 20–30% .
Centralized Procurement Example: China Mobile

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

China Mobile's centralized procurement from 2023–2024 illustrates large-scale pricing dynamics:

• Procurement Scale: Approximately 3.389 million skin-length kilometers (≈108.2 million core kilometers).

• Bid Price Limit: The total maximum bid was set at RMB 7.6 billion (excluding VAT), reflecting the scale and competitive nature of centralized procurement .

• Market Competition: The tender invited 13–14 successful bidders, with the largest share around 19.36% of total procurement. This structure encourages price competition among major suppliers, potentially lowering unit costs compared to smaller or less competitive purchases .
Key Takeaways
• Unit Costs: For centralized procurement, expect $0.05–$6 per foot depending on cable type, fiber count, and environmental specifications.

• Bulk Discounts: Large-scale orders often benefit from manufacturer discounts and competitive bidding, which can reduce per-unit costs by 20–30% compared to retail prices .

• Project Planning: Costs also include logistics, permits, and installation if part of the procurement contract, though some tenders focus solely on materials . In summary, centralized procurement significantly affects optical fiber cable pricing, with bulk scale, cable specifications, and competitive bidding being the main determinants of cost. Large tenders like China Mobile's demonstrate how total bid limits and supplier shares influence market pricing and competition .
