How to Choose Fiber Optic Patch Cords in Ukraine

Overview

Volza''s data of Ukraine Fiber Optic Patch Cable imports helps you create a import strategy from detailed trade data with buyer supplier names, price, volume for last 10 years.

Key Takeaways

SC and LC patch cords are the most commonly used fiber optic patch cords in Ukraine, supporting both single-mode and multi-mode networks for indoor and outdoor applications. Popular Connector TypesSC (Subscriber Connector): Rectangular housing with a plug-in latch, 2. 5mm ceramic ferrule, widely used in routers, switches, optical modems, and transceivers.

S

C patch cords are compatible with both single-mode and multi-mode fibers and are suitable for short-distance LANs and long-distance data centers.

L

C (Lucent Connector): Small form factor with 1. 25mm ceramic ferrule, modular jack latch, ideal for high-density environments, connecting SFP modules and servers.

F

C (Ferrule Connector): Screw-type fastener, commonly used in fiber optic patch panels, less frequent in modern networks.

S

T (Straight Tip): Round clip connector, often used in enterprise or campus networks, also less common than SC and LC. Fiber TypesSingle-mode fibers (G. 657.

A2, G. 652. D): Used for long-distance transmission and FTTx networks.

G. 657. A2 fibers offer a smaller bending radius, making them flexible for indoor installations.

Multi-mode fibers (OM3, OM4, OM5): Suitable for high-speed data centers and short-distance applications.

Patch Cord Configurations

Simplex and Duplex: Simplex for single fiber connections, duplex for bidirectional communication. Hybrid Patch Cords: Connectors of different types on each end (e.g., SC to LC) for network flexibility. Ribbon, Round, Flat, Breakout, or Bundled Cables: Designed for indoor, outdoor, or high-density applications.

Applications in Ukraine

Indoor networks: Subscriber outlets, final distribution points, LAN/WAN/MAN networks.

FT

Tx and FTTH networks: Branching optical signals in passive optical networks like EPON, GPON, BPON. Data centers: High-density connections using LC connectors and multi-fiber MPO/MTP assemblies. Outdoor and industrial use: Armored patch cords and waterproof cables for harsh environments.

Local Manufacturers

Fibercord: Produces high-quality patch cords and pigtails of various modifications in Ukraine. Odeskabel: Offers optical patch cords, pigtails, and network cables meeting European standards.

Nano

Connect: Supplies indoor SC/UPC patch cords with G. 657. A2 single-mode fiber, supporting up to 10 Gbps transmission.

In summary, SC and LC patch cords dominate the Ukrainian market, with single-mode fibers for long-distance and multi-mode fibers for high-speed short-distance applications. Local manufacturers provide a wide range of indoor, outdoor, and hybrid patch cords to meet diverse network deployment needs.
