Nepal Fiber Optic Cable Single Mode

Overview

Buy Ziasys Optical Fiber Cable 1 Core 100m (Z-OFLCX/F100) with single-mode fiber and 1310/1550 nm wavelength support.

Key Takeaways

Single-mode fiber optic cables in Nepal are widely available for high-speed, long-distance data transmission, with SC, LC, and SCAPC connectors commonly used for FTTH, FTTB, and FTTx networks.Overview of Single-Mode Fiber Optic Cables

Single-mode (SM) fiber optic cables are designed for long-distance and high-bandwidth transmission, using a small core (typically 9 µm) that allows only one light mode to propagate. This minimizes signal loss and dispersion, making them ideal for telecommunications, internet backbones, CATV, and data networks . SM cables are available in simplex (single core) or multi-core configurations, and can be used both indoors and outdoors depending on the cable type .

Common Connectors
• SC (Subscriber Connector): Standard connector with a push-pull design, widely used in telecom and FTTH networks .

• LC (Lucent Connector): Smaller form factor, often used in high-density patch panels .

• SCAPC (Angled Physical Contact): Angled polished connector that reduces back reflection and improves performance over long distances, ideal for high-speed networks .

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• UPC (Ultra Physical Contact): Standard polished connector with low insertion loss, suitable for general SM applications .

Applications

Single-mode fiber optic cables in Nepal are used for:

• FTTH (Fiber to the Home), FTTB (Fiber to the Building), and FTTP (Fiber to the Premises) networks

• Long-distance data transmission in telecom and enterprise networks

• CATV and video transmission

• Optical test instruments and photoelectric control systems

Local Availability in Nepal

Several suppliers provide single-mode fiber optic cables and accessories:

• Daraz Nepal: Offers SC-SC simplex SM patch cords and outdoor drop cables with low insertion loss and high return loss .

• ITShop Nepal: Sells outdoor single-mode fiber optic cables (GYXTC8Y) priced per meter .

• Platforms Hub: Provides a range of fiber optic infrastructure and accessories from leading brands .

• Mystore Nepal: Offers 3M SC-SC single-mode simplex patch cords with home delivery .

• Ubuy Nepal: Supplies LC-SC single-mode patch cables (OS1 9/125 µm) suitable for FTTH and FTTB systems .

Key Considerations

• Outdoor vs. Indoor: Outdoor-rated cables have additional protection against weather and UV exposure, while standard SM cables are primarily for indoor use .

• Connector Type: Choose SCAPC for long-distance, high-speed networks to reduce back reflection; UPC or standard SC connectors are sufficient for shorter distances .

• Cable Length and Core Count: Simplex cables are single-core, while multi-core cables support multiple connections in one sheath, useful for larger installations .

Single-mode fiber optic cables in Nepal provide reliable, high-speed connectivity for both residential and commercial networks, with multiple options for connectors, lengths, and outdoor durability to suit various deployment needs .
