Price of Empty Fiber Optic Panel Box

Overview

LANshack offers top of the line fiber optic connectivity products such as termination enclosures and adapter panels. Shop online now!

Key Takeaways

Empty fiber optic panel boxes typically range from $20 to $150 depending on size, slots, and construction.Overview

Empty or blank fiber optic panel boxes, also known as fiber patch panels or termination boxes, are used to organize and protect fiber optic cables while maintaining proper bend radius and network accessibility . They come in various styles, including swing-out, slide-out, and fixed enclosures, and can accommodate different numbers of adapter panels or LGX cassettes . Common sizes include 1U, 2U, and 3U, with slot capacities ranging from 12 to 288 fibers .

Price Range
• Small 1U blank panels (holding 12–24 fibers) generally cost $20–$50. These are suitable for small network racks or single applications .

• Medium panels (24–48 fibers, 1U–2U) typically range from $50–$100, offering more flexibility for growing networks .

• Large panels (3U, 12-slot or 288-fiber capacity) can cost $100–$150 or more, especially when constructed from 16-gauge steel with heavy-duty support arms for stability .
Considerations
• Material and durability: Steel panels are more robust and often slightly more expensive.

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• Mounting style: Swing-out or slide-out panels provide easier access but may cost more than fixed panels .

• Compatibility: Ensure the panel supports your chosen adapter type (LC, SC, ST) and LGX cassettes if needed .

• Warranty and return policy: Some manufacturers, like Black Box, offer lifetime warranties and 30-day return policies, which can add value to the purchase . For exact pricing, it is recommended to check suppliers like Fiber Savvy, LanShack, Primus Cable, or Black Box, as prices can vary based on quantity, shipping, and specific configurations .
