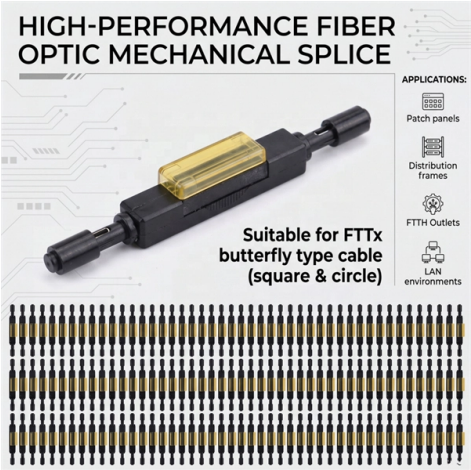
Price of Vertical Support Cable Tray



Overview

Cable tray are used in wiring of buildings to support electrical cables and wires that are used to distribute power, controls and communication.

Key Takeaways

Vertical support cable trays typically range from $50 to $300 per unit, depending on material, size, and supplier. Vertical cable trays are essential for organizing and supporting cables in multi-level buildings and industrial facilities, ensuring safe routing and reducing maintenance issues. Prices vary significantly based on material: steel trays are generally more affordable, fiberglass or aluminum trays cost more due to corrosion resistance and lightweight properties.

The size and load capacity also influence cost, with larger or heavy-duty trays priced higher. Factors affecting price: Material: Galvanized steel, stainless steel, aluminum, or fiberglass (FRP/GRP) each have different costs. Dimensions: Height, width, and length of the tray affect the price.

Finish: Coatings like galvanization or powder coating increase durability and cost. Supplier and quantity: Bulk orders or direct vendor purchases may reduce per-unit cost, while custom sizes or small orders can be more expensive. Typical price ranges: Small steel vertical trays: $50–$100 per unitMedium to large steel or aluminum trays: $100–$200 per unitFiberglass or specialized trays: $200–$300 or more per unit For precise pricing, it is recommended to contact suppliers directly such as Graybar, CEF, or Alibaba, providing specifications and quantities to receive accurate quotes.

This ensures the selected tray meets load, environmental, and safety requirements for your project.
