

Belarusian large-core optical fiber OM3

Overview

In 2003, the OM3 fiber type was standardized and is closely linked to the IEEE 802.3 10GbE Ethernet standard. It has a core diameter of 50 μm and a modal bandwidth of 2000 MHz/km.

Key Takeaways

OM3 multimode fiber is a 50 μm laser-optimized fiber designed for high-speed Ethernet and data center applications, supporting 10G, 40G, and 100G networks over medium distances. Technical Specifications OM3 fiber has a 50 μm core diameter and a 125 μm cladding, optimized for laser-based transmission using vertical-cavity surface-emitting lasers (VCSELs) at 850 nm wavelength. It features a modal bandwidth of 2000 MHz·km, which allows high-speed data transmission over medium distances.

Typical OM3 fiber supports: 10 Gigabit Ethernet up to 300 meters 25G Ethernet up to 70 meters 40G/100G Ethernet up to 100 meters OM3 fiber is commonly used in large buildings, campuses, and data centers, where multiple network segments require high-speed connectivity.

Advantages

High data rate support: Suitable for 10G, 40G, and 100G Ethernet systems
Laser-optimized multimode fiber (LO-MMF): Reduces modal dispersion and improves signal quality over longer distances compared to older OM1/OM2 fibers
Interference resistance: Immune to electromagnetic interference and does not require grounding
Flexible connectivity: Compatible with ST, LC, and other multimode connectors, allowing duplex or multi-channel configurations
Backward compatibility: Works with existing OM2 and OM3 systems, enabling network upgrades without full infrastructure replacement
Product Availability in Belarus: Belarusian suppliers offer OM3 patch cables and fiber leads, such as 15-meter ST-to-LC duplex cables with aqua jackets, halogen-free and flame-retardant construction.

These cables are suitable for 10G Ethernet networks and can be integrated into existing multimode fiber infrastructures. Local distributors may provide additional lengths and connector types to meet specific network requirements. Applications
OM3 fiber is ideal for: Data centers and server rooms
Campus networks and large office buildings
High-speed Ethernet, Fibre Channel, and InfiniBand networks
Future-proofing for 40G and 100G systems
In summary, OM3 large-core multimode fiber in Belarus provides a reliable, high-performance solution for medium-distance, high-speed network deployments, offering compatibility with modern laser-based transceivers and future network upgrades.

Fiber Optic Cable; 10GB Aqua Multimode LC/LC Duplex

Ideal as part of a backbone network, this fiber optic cable uses laser-optimized multimode fiber that has a larger diameter and greater light-gathering capacity

OM1 vs OM2 vs OM3 vs OM4 vs OM5 Multimode Fiber Guide | EDGE

In 2003, the OM3 fiber type was standardized and is closely linked to the IEEE 802.3 10GbE Ethernet standard. It has a core diameter of 50 μm and a modal bandwidth of 2000 MHz/km.

Understanding OM3 Multimode Fiber: Advanced Guide

Explore our advanced guide on OM3 multimode fiber optic cables to understand the differences between OM1, OM2, and OM3, and find the best fiber

Multimode Optical Fiber Selection & Specification

For prevailing 10 Gigabit transmission speeds, OM3 is generally suitable for distances up to 300 m, and OM4 is suitable for distances up to 550 m.

Multimode Fiber Guide: OM1 to OM5 | PHILISUN

OM3 is a laser-optimized multimode fiber commonly used for 10G links and shorter 40G or 100G multimode connections. It is a practical option when link distances are modest and the project

HES 48 Core Steel Armored Fiber Optic Cable OM3 50/125μ MultiMode |

HES 48 Core and HES 96 Core fiber optic cables are sold as 2000m reels. Features: OM3 MultiMode Design: With a 50/125μ core-core diameter, OM3 MultiMode fiber technology provides high

Guide To Multimode Fiber (62.5um & 50um, OM1 to OM5)

OM3 Glass is laser-optimized glass and has a diameter of 50 microns. It can transmit data over longer distances than OM2 fiber, up to 300 meters at a data

Complete Guide to Fiber Optic Cables for Data Centers

Everything you need to know about fiber optic cables for data center deployments. Covers OS2, OM3, OM4, OM5 cable types, LC/SC/MPO connectors, and

How Far Can Multimode Fiber Optic Cables Transmit?

As an industry-leading provider of fiber optic solutions, we offer a wide range of multimode fiber cables, including but not limited to OM1, OM2,

Fiber Optic Pigtail: Types, Splicing Guide, Specs & Price

Fiber optic pigtail guide : SC/APC & LC/UPC connectors, 0.9/2.0/3.0 mm buffers, single-mode and multimode types, fusion splicing steps, price ranges, specifications, and how to

5 Best Fiber Optic Cable For Internet | 30M Armored Fiber: Speed

OS2 single-mode fiber uses a 9μm core for 1310nm to 1550nm lasers, which matches the optics inside your ISP's central office and ONT. OM3 multimode uses a larger 50μm core for 850nm VCSEL

Fiber Optic Patch Cord

Fiber patch cords are one of the most widely used basic components in optical communications. UnitekFiber supplies FCSTSCLCMTRJ and PCAPCUPC patch cord in cheap price. Welcome

Fiber Optic Patch Cords Guide | Types, Connectors & Applications

Explore fiber optic patch cords for telecom, data centers, and FTTH. From LC/SC to MPO/MTP and armored jumpers, ZION Communication offers high-quality, customizable fiber patch

Best Direct Burial Fiber Optic Cable Solutions for Harsh Environments

The cable supports long-distance, high-speed networking with bend-insensitive OM3/OM4 fibers, delivering strong performance for enterprise campuses, data centers with outdoor spans, or

Single Mode Fiber: Types and Applications

Single mode fiber (SMF) is a type of fiber optic cable that only allows one light mode to transmit at a time. Generally, single mode cable has a narrow core diameter of 8 to 10µm

The Ultimate Fiber Optic Cable Size Reference Chart

How to Use This Chart Understanding fiber optic measurements doesn't have to be overwhelming. Our comprehensive chart simplifies the process by outlining the key

Fiber Optic Pigtails | SC, LC, ST Single Mode & Multimode

Find high-quality fiber optic pigtails for reliable network termination. We offer a full range of single mode and multimode pigtails with SC, LC, ST, and FC connectors.
