South African Fireproof Cable Tray Custom Manufacturer

Overview

Being one of the leading Cable Tray Manufacturers in South Africa, we work for customer satisfaction and design and deliver the standard and customized range accordingly.

Key Takeaways

Leading South African manufacturers of fireproof and industrial cable trays include Saar Industries, Brilltech Engineers, CMG, Cabstrut, and Advanced Strut, offering ISO-certified, durable, and standards-compliant solutions.

Key Manufacturers and Offerings

Saar Industries is a prominent manufacturer of industrial cable trays in South Africa, producing ladder-type, perforated, and wire mesh trays suitable for commercial and heavy-duty applications. Their products are ISO 9001: 2015 certified and designed to meet international standards for secure and efficient cable management, including fire-resistant applications where airflow and cable protection are critical. Brilltech Engineers supplies high-quality cable trays made from galvanized steel, stainless steel, and fiberglass.

Their perforated trays enhance airflow, reducing overheating risks, and are suitable for fireproof installations. They provide technical support for system design, installation, and compliance with safety regulations. Cable Management Group (CMG) offers perforated and ladder cable trays for light, medium, and heavy-duty industrial use.

Their products are engineered for durability and fire safety, with cold-formed metal channels and complementary accessories such as conduit fittings, cable glands, and strapping. Cabstrut manufactures light-duty cable trays from pre-galvanized steel compliant with SANS 3575: 2008 / ISO 3575: 2005, ensuring corrosion resistance and structural integrity. Their trays are designed for easy installation without splices, supporting fire-resistant cable routing.

Advanced Strut provides a wide range of cable management solutions, including wire mesh trays, cable ladders, and support channels suitable for fireproof and high-safety installations. Their products cater to electrical, data, solar, and industrial applications, emphasizing durability, compliance, and efficient cable containment.

Specifications and Standards

Materials: Galvanized steel, stainless steel, fiberglass (for fire resistance and durability)Types: Ladder trays, perforated trays, solid-bottom trays, wire mesh traysStandards Compliance: ISO 9001: 2015, SANS 3575: 2008 / ISO 3575: 2005Features: Fire-resistant design, enhanced airflow, corrosion resistance, easy installation, and support for heavy-duty cablesApplications: Industrial plants, power plants, commercial buildings, infrastructure projects, and high-safety electrical systemsConsiderations for Fireproof InstallationsPerforated trays allow ventilation to prevent overheating of fire-rated cablesSolid-bottom trays provide maximum protection for sensitive or high-voltage cablesMaterial selection (stainless steel or fiberglass) enhances fire resistance and longevityCompliance with local and international standards ensures safety and regulatory approval These manufacturers provide both products and technical support, including system design, installation guidance, and compliance verification, making them suitable partners for fireproof cable tray projects in South Africa.
