Which company manufactures pigtail fiber in Libya

Overview

LPTICIt is considered the backbone of the infrastructure projects taking place in Libya, which will serve all other sectors and all the projects that will.

Key Takeaways

There is no publicly documented local manufacturer of pigtail fiber in Libya; most fiber optic components are supplied through international partnerships and local integrators. Key Companies in Libya's Fiber Optic SectorAfaq ICT Company provides comprehensive fiber optic services, including network design, installation, and testing, but does not explicitly manufacture pigtail fiber locally. Global Technology Company (GTC) is a Libyan technology integrator deploying nationwide fiber optic networks in partnership with GECOL, focusing on long-haul optical transport and FTTX access networks.

They handle installation and operation but rely on imported fiber components. Hatif Libya, part of the state-run Libyan Telecommunication Holding Company (LPTIC), collaborates with U. S.-based Infinera to upgrade Libya's optical transport network, using advanced international equipment for pigtails and optical connections.

Practical Implications

Currently, Libya's fiber optic infrastructure relies heavily on imported components, including pigtail fibers, from international manufacturers. Local companies primarily focus on network integration, installation, and maintenance rather than producing fiber optic cables or pigtails. Organizations seeking pigtail fiber in Libya typically source them through these integrators or international suppliers.
