

China Unicom gigabit fiber optic cable price

Overview

Explore high-quality China Unicom fiber optic and network cables for reliable connectivity. Durable outdoor duct, aerial, and indoor solutions ideal for FTTH, 5G, and LAN applications.

Key Takeaways

The price of China Unicom gigabit fiber optic cables typically ranges around RMB 105 per core-kilometer for standard G. 652D single-mode outdoor cables, with variations depending on fiber count, brand, and cable structure.

Typical Pricing

Recent procurement data from China Telecom's 2026 projects indicates that fiber cost reaches approximately RMB 105 per core-km for standard loose tube armored single-mode G. 652D cables, which are commonly used in large-scale telecom deployments. This provides a useful benchmark for China Unicom gigabit fiber installations, as similar specifications are standard across major operators.

Factors Affecting Price

Fiber Count: Higher core counts (e.g., 48, 96, or 144 cores) do not scale linearly in price because manufacturing costs like extrusion remain similar. Bulk high-count cables often offer a lower price per fiber. **Fiber Brand:** Premium brands such as Corning, YOFC, or FiberHome cost more but ensure low attenuation (
