

Companies that manufacture fiber optic end-face inspection instruments

Overview

We also offer two scanning white-light interferometers (SWLI) that enable detailed measurements of the connector end face for inspection and quality-control applications.

Key Takeaways

Dimension Technology, Thorlabs, and Fluke Networks are leading manufacturers of fiber optic end-face inspection instruments, offering desktop, portable, and automated solutions for high-precision optical testing.

Dimension Technology

Dimension Technology specializes in fiber end-face inspection and cleaning solutions for optical fiber manufacturing, engineering, and maintenance. Their product range includes desktop and portable microscopes, as well as fully automatic end-face inspection systems like the FastCheck V2, which provide high-definition imaging, AI-assisted defect detection, and rapid inspection of connector end-faces. Dimension's instruments are designed for applications in telecom, data centers, and high-speed optical modules, supporting 400G/800G networks and ensuring reliable optical transmission.

They also offer a wide variety of adapters and tips to accommodate different fiber types and connectors.

Thorlabs

Thorlabs provides fiber end-face inspection systems including Fiber Cleave Analyzers for interferometric measurements and Visual Scratch & Defect Inspection Systems for connector end-faces. They also offer scanning white-light interferometers (SWLI) for detailed quality control and a selection of fiber inspection scopes and eye loupes. Thorlabs' instruments are suitable for both laboratory and field applications, enabling precise inspection of bare fibers and connectorized fibers.

Fluke Networks

Fluke Networks' FI-7000 FiberInspector Pro is a portable inspection scope that allows automated PASS/FAIL certification of fiber optic connector end-faces in seconds. It highlights defects clearly, stores images, and integrates with other testing platforms like CertiFiber Pro OLTS and OptiFiber Pro OTDR for comprehensive fiber network documentation. The FI-7000 is designed for field technicians and network engineers, providing fast, reliable inspection and compliance with industry standards (IEC 61300-3-35).

Key Features Across Manufacturers
High-resolution imaging for detecting micron-level defects
Automated pass/fail analysis to reduce operator error
Portable and desktop options for field and lab use
AI-assisted inspection for rapid defect detection and reporting
Compatibility with multiple fiber types and connectors via adapters and tips
Applications
Fiber optic end-face inspection instruments are essential in:
Telecommunications and data centers for connector verification and maintenance
Optical module manufacturing to ensure high-quality pigtailling and assembly
Field engineering projects to inspect and clean connectors before and after installation
These manufacturers provide reliable solutions for ensuring clean, undamaged fiber end-faces, which are critical for minimizing signal loss, reflection, and network downtime.

Fiber End Face Inspection

We also offer two scanning white-light interferometers (SWLI) that enable detailed measurements of the connector end face for inspection and quality-control applications. Additionally, a selection of fiber

Fiber Endface Inspection – connectors, bare fiber ends,

Nyfors offers high precision interferometers for checking the end face quality of cleaved optical fibers and for cleave process optimization. They show crisp and

Fast Check MT Fully Fiber Endface Inspector

Dimension Technology has launched a new FastCheck MT Fully Fiber Endface Inspector, which is designed for multi-core optical modules and high-density connectors.

Endface Inspection-DIMENSION

Dimension is committed to building a series of portable fiber optic end face probes/microscopes, becoming ideal tools for inspecting fiber connector end-face defects before and after network

Sumix | Fiber inspection tools for production and maintenance

High-resolution industrial interferometers to control quality of single fiber and multi-fiber connectors, ferrules and bare fiber, with the capability of measuring guide holes angles and parallelism for MPO

Fiber Inspection Scope Products

Shop fiber optic inspection scopes, including single- and multi-fiber inspection products from trusted brands like Dimension, Domaille, Viavi, and Jonard.

Purchase Fiber Optic Inspection Tools Online

Buy fiber optic inspection equipment and tools from Cables Plus USA. Our fiber optic inspector tools offer networking installers many choices of endface inspectors and probes including single/multi-fiber

WebProcure

WebProcure offers best-in-class functionality, reaching end-to-end from requester to procurement buyer to merchant, and all the way back! Designed specifically for the public sector.
