

Cost of NEMA4X Fiber Optic Cable Trays for Surveillance Use

Overview

NEMA 4X Boxes | Boxes, Enclosures, Racks | DigiKeyShop DigiKey's large in-stock selection of Boxes. View inventory, pricing and order now for same day ship.

Key Takeaways

NEMA 4X fiber optic enclosures for surveillance applications typically range from \$200 to \$800 or more depending on size, port capacity, and material, though exact pricing requires vendor quotes. Overview NEMA 4X enclosures are designed for indoor and outdoor use, providing protection against dust, dirt, oil, water, and corrosive environments, making them ideal for surveillance networks exposed to harsh conditions. They are commonly used for fiber optic patching, splicing, and termination in security camera systems, FTTH, or building-to-building links.

Key Features

Material: Aluminum with polyester powder coating or fiberglass-reinforced polyester for corrosion resistance. **Port Capacity:** Available in sizes supporting 12 to 96 fiber ports, with some enclosures accommodating up to 288 terminations using splice trays. **Security:** Lockable network compartments and pad-lockable outer doors for added protection.

Cable Management: Includes splice trays, strain relief kits, and adapter panel support for organized fiber routing. **Environmental Rating:** NEMA 4X ensures water-tight, dust-tight, and corrosion-resistant performance suitable for outdoor surveillance installations.

Typical Cost Considerations

Small enclosures (12–24 ports): Usually start around \$200–\$300. Medium enclosures (48–72 ports): Typically \$400–\$600. Large enclosures (96+ ports or high splice capacity): Can exceed \$700–\$800, especially for heavy-duty or specialized outdoor models.

Additional factors: Custom configurations, pre-terminated assemblies, or specialized environmental features can increase cost. Vendors and Options
LANshack: Offers 4-panel wall-mount NEMA enclosures with up to 288 terminations, suitable for both splicing and patching.

Cables Plus US

A: Provides NEMA 4-rated 4-panel fiber distribution units with lockable doors and corrosion-resistant aluminum construction.

OC

C Fiber: Offers molded fiberglass-reinforced polyester NEMA 4X enclosures for 12–96 fiber ports, suitable for corrosive or high-temperature environments. Primus Cable: Supplies outdoor fiber dome closures and inline enclosures with integrated slack storage and hinged trays for surveillance networks. For accurate pricing, it is recommended to request quotes from suppliers based on the required port count, environmental rating, and installation type.

This ensures the enclosure meets both budget and technical requirements for your surveillance fiber optic network.
