

Customized Fiber Optic Cable Solutions

Overview

Fiber Optic The better, faster, easier way to build fiber optic cables is here. Use our online cable configurator for custom fiber, copper, and RF Welcome.

Key Takeaways

Customized fiber optic cables can be designed to meet specific technical requirements, including fiber type, connector style, jacket material, and cable configuration, for applications ranging from telecommunications to industrial and medical systems. Key Features of Custom Fiber Optic Cables

Fiber Types: Custom cables can use a variety of fibers depending on performance needs. Options include silica-silica fibers for high-performance lasers and UV applications, borosilicate for high temperature and chemical resistance, PMMA for lightweight and flexible solutions, and Silica-Hard-Clad for enhanced mechanical durability . **Connector Options:** A wide range of connectors is available, including LC, SC, ST, FC, MTRJ, MTP, APC, UPC, and specialized connectors like SMA or FSMA for laboratory or spectrometer applications . **Jacket Materials and Types:** Cables can be configured with jackets suitable for indoor, outdoor, armored, aerial, tactical, zip cord, or tight-buffered applications. Materials include PVC, silicone, or stainless steel, providing protection against mechanical stress, temperature extremes, and environmental exposure . **Cable Configuration:** Customization allows for any fiber count (1-48 strands or more), any length, and plenum or riser ratings (OFNR/OFNP). Multi-fiber breakout cables and high-density wiring solutions are also available for complex network setups . **Quality and Standards:** Leading manufacturers ensure ISO 9001:2015 and TL-9000 certified production, with rigorous testing for optical performance, mechanical durability, and end-to-end traceability. Some suppliers offer lifetime warranties on workmanship .

Applications

Customized fiber optic cables are used in telecommunications, data centers, industrial automation, medical devices, laser systems, and harsh environmental conditions. They provide reliable signal transmission even under high thermal, chemical, or mechanical stress .

Suppliers and Configurators

- Amphenol Custom Cable offers rapid delivery of custom fiber, copper, and RF cables with engineering support and no minimum order requirements .
- FS provides multi-fiber breakout and patch cables with low-loss or high-density options .
- Fiber Cables Direct and FOS Inon Fiber Optics allow online configuration of cables to exact specifications, including fiber type, connector, jacket, and length . Customized fiber optic cables provide flexibility, high performance, and reliability, making them ideal for projects requiring precise specifications and robust connectivity solutions.
