Key Takeaways

Distribution boxes vary by type, number of ways, dimensions, material, and mounting style, with options ranging from 1-way to 36-ways and sizes from compact residential units to large industrial enclosures.

Types and Materials

Plastic Distribution Boxes: Made of flame-resistant ABS plastic, commonly used in residential and commercial applications. Examples include MB-ABC, MB-AF, MB-AS, and MB-LF series.

High-

Density Polyethylene Boxes: Durable, non-corrosive, lightweight, suitable for outdoor or industrial use, often with twist-lock pipe seals and optional risers for inspection.
Consumer Control Units: Also called electricity control units, these are flush or surface-mounted, protecting circuits from overload and providing organized distribution.
Number of Ways (Outlets) Residential and commercial boxes typically range from 1-way to 36-ways, depending on the series and application.

Modular boxes allow flexible installation of circuit breakers and other equipment, supporting multiple circuits in a single enclosure.

Dimensions

Plastic MB-ABC Series: Length 200–328 mm, Width 172–174 mm, Height 95 mm.

H

A, HK, LGD Series: Length 100–415 mm, Width 105–323 mm, Height 75–140 mm.
Industrial Polyethylene Boxes: Dimensions vary with riser height; standard risers provide at-grade access and can be adjusted for increased head installations.

TO

P Series (TOP-TS, TOP-TF, etc.): Dimensions and mounting sizes vary by number of ways, from 1-way to 36-ways.

Mounting and Installation

Flush Mounting: Fixed inside walls for a clean appearance. Surface Mounting: Hung on wall surfaces, suitable for industrial or exposed locations. Risers and Seals: Polyethylene boxes may include risers with anti-flotation adapters and twist-lock seals for gas or watertight installations.

Features and Standards

Protection: Flame-proof, impulse-proof, and excellent insulation for plastic boxes.

Compliance: Many boxes conform to standards such as BS EN60439-3 and JB/T7121-93. Accessories: Include neutral and earth copper bars, guide rails, covers, and optional stainless steel screws for tamper prevention.

Cable Management: Standard cable lengths and inlet/outlet elevations are designed for equal distribution and code compliance.

Summary

Distribution boxes are selected based on number of ways, dimensions, material, mounting type, and compliance requirements.

Plastic AB

S boxes are ideal for residential and commercial use, while high-density polyethylene boxes are suited for industrial and outdoor applications. Modular designs allow flexibility, and proper installation ensures safety, accessibility, and durability.
