

Does Huawei have gigabit optical modules

Overview

Accelerating Gigabit and Ultra-Gigabit Development, Boosting Huawei is looking forward to working with global carriers and partners to accelerate the constr.

Key Takeaways

The Huawei OEGD01N01 is a 1000BASE-T SFP optical module supporting gigabit speeds with RJ45 connectivity. Overview of Huawei Gigabit Optical Modules

Huawei offers a range of optical modules for different transmission rates, including gigabit (GE) SFP modules, which are designed for high-speed data transmission in enterprise and data center networks . These modules are hot-swappable and compatible with various Huawei networking devices, providing flexible deployment options.

Huawei OEGD01N01 1000BASE-T SFP Module

The OEGD01N01 is a widely used gigabit optical module with the following features :

- Interface Type: RJ45 electrical module, supporting standard Ethernet cabling.
- Transmission Speed: 1000 Mbps (1 Gbps) for gigabit network connectivity.
- Auto-Negotiation: Supports automatic speed and duplex negotiation for seamless integration.
- Maximum Distance: Up to 100 meters over standard copper cabling.

- **Compatibility:** Works with a wide range of Huawei switches and routers, making it suitable for corporate networks, data centers, and educational institutions.
- **Ease of Use:** Plug-and-play design ensures quick installation and replacement without network downtime.

Applications

Gigabit SFP modules like the OEGD01N01 are ideal for:

- **Enterprise Networks:** Connecting switches and routers within office environments.
- **Data Centers:** Providing reliable 1 Gbps links for server racks and storage systems.
- **Educational Institutions:** Supporting campus networks with scalable and efficient connectivity.
- **Flexible Network Expansion:** Hot-swappable design allows easy upgrades or replacements without disrupting network operations.

Additional Notes

Huawei's optical module portfolio also includes higher-speed modules such as 10G SFP+, 25G SFP28, 40G QSFP+, and 100G QSFP28, allowing organizations to scale their networks as needed. For gigabit applications, SFP modules like the OEGD01N01 remain a cost-effective and reliable choice. In summary, for gigabit optical connectivity, the Huawei OEGD01N01 1000BASE-T SFP module is a robust and compatible solution suitable for a variety of networking environments.
