Electrical Cable Tray Concealed Acceptance Form

Overview

Cable Tray Installation Rules (NEC 392) – Electrical TraderCore rules for selecting, installing, grounding, and filling cable trays—clearances, materials.

Key Takeaways

A Cable Tray Concealed Acceptance Form documents inspection and approval of cable tray installations before they are concealed, ensuring compliance with project specifications and electrical standards.Purpose

The form is used to verify that all cable trays, ladders, and associated fittings are installed correctly, meet project specifications, and comply with relevant standards such as NEC, NFPA 70, IEC 61537, and NEMA VE 1 before being covered by walls, ceilings, or floors . It ensures traceability and accountability for quality control.

Key Sections of the Form
• Project Information
• Project Name and Location

• Contractor / Subcontractor Name

• Date of Inspection

• Inspector Name and Signature

• Material Verification
• Cable tray type (ladder, ventilated trough, solid bottom, wire mesh)

- Material (steel, aluminum, stainless steel, fiberglass) and finish
- Manufacturer and model/reference number
- Compliance with standards (UL 568, IEC 61537, NEMA VE 1, NFPA 70)
- Installation Verification
- Review of approved shop drawings and layout
- Correct support spacing and alignment
- Proper fixing and anchoring
- Clearance from other services
- Conformance to load/span requirements
- Verification of grounding and bonding
- Inspection Checklist
- Physical condition of trays (no damage, corrosion, or deformation)
- Correct installation of fittings and accessories
- Cable tray routing matches approved drawings
- Adequate separation from heat sources or electrical hazards
- Compliance with fire and safety regulations
- Remarks / Non-Conformance
- Any deviations from specifications
- Corrective actions required before concealment
- Approval Section
- Inspector's signature and date
- Project engineer or client representative approval
- Final acceptance statement confirming readiness for concealment

Best Practices

- Conduct inspection before covering trays to avoid costly rework .
- Ensure all materials are verified against approved submittals and standards .
- Document any non-conformances and corrective actions clearly.
