

Electromagnetic starter for explosion-proof distribution box

Overview

The SEQD series provides explosion-proof motor starting and power distribution in Zones 1, 2, 21, and 22.

Key Takeaways

Explosion-proof electromagnetic starters are specialized motor control devices designed for hazardous environments, providing safe starting, stopping, and protection of three-phase asynchronous motors.

- **Hazardous Area Suitability:** Designed for Zone 1 and Zone 2 explosive gas atmospheres, and Zone 21 and Zone 22 combustible dust areas, with temperature classes T1-T6 .
- **Motor Control:** Primarily used for infrequent starting and stopping of three-phase asynchronous motors, with rated AC voltage of 380V/660V and rated current up to 100A .
- **Protection Functions:** Include under-voltage, overload, and short-circuit protection, often integrated with phase-protector switches and solid-state overload relays for precise motor current monitoring .
- **Enclosure and Materials:** Housings are typically made from cast aluminum alloy, stainless steel, or welded steel plates, with epoxy or plastic coatings for corrosion and condensation resistance. Many models meet IP66 protection standards .

- Control Options: Can be operated locally on the panel or remotely, with terminals for distance control. Some models offer diversified inlet and outlet wiring methods, including conventional, steel pipe, or aviation plug connections .

Standards and Certifications

- NEMA Compliance: NEMA Type 3, 3R, 4, 4X enclosures for protection against internal explosions and environmental factors .
- ATEX Certification: Optional ATEX approval for Class I, Zone 1, AExd IIB, Exd IIB+H2, and IEXEx, ensuring compliance with international explosion-proof standards .
- UL and CE Approvals: Many models include UL489-approved thermal magnetic circuit breakers or non-fusible disconnects for safe operation and quick reset after faults .

Applications

Explosion-proof electromagnetic starters are widely used in industries such as:

- Petroleum extraction and refining
- Chemical and pharmaceutical manufacturing
- Food processing and precision electronics
- Military, aerospace, and LNG projects They are suitable for both indoor and outdoor installations in hazardous environments, providing reliable motor control while preventing ignition of explosive atmospheres .

Popular Models

- DBQ Series: DBQ58-10 to DBQ58-100, covering motor power from 4 kW to 45 kW, with optional local or remote control .
- CE81/CE81-2 Series: Compact, customizable explosion-proof distribution boxes with stainless steel fasteners, epoxy resin coating, and IP66 protection, suitable for international projects . These starters combine safety, durability, and flexibility, making them ideal for critical industrial applications where explosive gases or dust are present.
