Equipment for producing optical cable splice closures

Overview

Cable Splicing Tools & Equipment, SpliceListRecommended tools and equipment for fiber optic and copper cable splicing professionals. Fusion splicers, OTDR.

Key Takeaways

Producing optical cable splice closures requires fusion splicers, fiber cleavers, splice trays, sealing components, cable glands, and testing equipment to ensure secure, organized, and protected fiber connections.Core Equipment for Splice Closures

Fusion Splicers: These devices align and fuse fiber optic strands to create low-loss, permanent connections. Core alignment splicers are standard in both aerial and underground deployments, offering fast splice times and high precision for single-mode and multimode fibers . Fiber Cleavers: Precision cleavers prepare fiber ends for splicing, ensuring clean, accurate cuts. High-quality cleavers maintain consistent angles under 0.5 degrees and can handle both 250µm and 900µm coated fibers . Splice Trays: These trays organize and protect individual splices within the closure. They provide mechanical support and prevent damage from environmental factors. Modular tray systems allow management of single or multiple circuits, accommodating various splice protectors and splitters . Sealing Elements and Cable Glands: Closures require watertight seals to protect fibers from moisture, dust, and temperature variations. Mechanical glands secure cables entering the closure, while sealing elements maintain environmental protection . Testing Equipment: OTDR (Optical Time-Domain Reflectometer) units verify splice integrity and network performance. They provide fast, accurate measurements for both single-mode and multimode fibers .

Types of Splice Closures
• Dome Splice Closures: Suitable for aerial, buried, or underground installations. They are reenterable and often use gel seal systems .

• Inline Splice Closures: Designed for direct burial applications, providing secure housing for splices along the cable path .

• Horizontal Splice Closures: Commonly used for indoor or building-to-building connections .

• High-Density and Compact Closures: Models like AFL Apex® or Prysmian XMJ/UMJ/CMJ/MMJ closures accommodate large fiber counts with modular trays for single or multiple circuits .
Additional Tools and Safety Equipment
• Heat Shrink Sleeves: Protect individual splices within trays.

• Safety Glasses and Fiber Disposal Containers: Protect technicians from sharp fiber shards.

• Lighting and Ergonomic Supports: Headlamps and knee pads improve field efficiency and safety .
Summary

Producing and managing optical cable splice closures involves a combination of precision splicing tools, protective trays, sealing systems, and testing equipment. The choice of closure type and tray configuration depends on the installation environment and fiber count, while proper use of fusion splicers, cleavers, and OTDRs ensures reliable, long-term network performance .

Cable Splicing Tools & Equipment, SpliceList

Recommended tools and equipment for fiber optic and copper cable splicing professionals. Fusion splicers, OTDR units, fiber

The FOA Reference For Fiber Optics

For every splice closure, it is important to follow the manufacturer''s instructions on stripping the cable to ensure proper lengths of

Fiber Optic Splicing Equipment

Fiber Instrument Sales has a wide variety of fiber optic splicing equipment such as fusion splicers from AFL, Sumitomo, FITEL, and

Fiber Optic Splicing Equipment

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

Browse our complete product line for cable assembly production, services, additional fiber applications and specialty applications, by

Fiber Optic Splicing

We distribute fiber optic splicing equipment from Corning, AFL, Sumitomo, 3M, 3SAE, Fitel and more.

What is a Splice Closure in Fiber Splicing?

A Fiber Splice Closure (also known as a Joint Closure) is an essential device used to protect and manage optical fiber

Fiber Optic Splice Closure Basics and Types

Horizontal types of splice closures look like flat or cylindrical box which provides space and protection for fiber optic

Fiber Splicing Methods and Protection with Splice Closures

Discover the differences between fusion and mechanical splicing, learn how to ensure safe fiber optic splicing, and

Everything You Need to Know about Optical splice closure

A optical splice closure is a protective enclosure that houses and shields fiber optic splices. These closures offer both

What Is a Fiber Optic Splice Closure?

A fiber optic splice closure serves as a crucial component in fiber optic networks. This

Apex® Fiber Optic Splice Closures Products

AFL''s Apex line of fiber optic splice closures, designed for high-density splicing and reliable protection in various environments.

Fiber Optic Closures: A Comprehensive Selection Tutorial

Conclusion Selecting the right fiber optic closure is crucial for ensuring the protection, organization, and

Fiber Optic Closures

Fiber Optic Closures Through our COYOTE ® fiber optics brand, PLP offers an industry-leading line of outside plant closures for

The FOA Reference For Fiber Optics

Choosing a connector type for any installation should consider if the connector is compatible with the
