

Fiber Optic Cable Order Details Table

Overview

- Fiber optic cables are often custom cut to match required lengths for each cable run, or you can order a reel matching your total length and cut segments yourself.

Key Takeaways

A structured table summarizing fiber optic cable specifications, types, and ordering codes for easy reference.

Unit

DP

E / PVCBlack3 x 2VariesCustomizableCustomizable-20 ~ +70Custom OrderOutdoor variant, FRP reinforcement, water-blocked, suitable for FTTX Key Notes on Ordering and SpecificationsFiber Types: Singlemode (G. 652. D, G.

657. A1/A2) and Multimode (OM1, OM2, OM3, OM4) are available depending on network requirements. Jacket Types: LSZH (Low Smoke Zero Halogen) is standard for indoor safety; PE or PVC jackets are used for outdoor durability.

Colors: Standard color coding helps identify fiber types and cores; white is default for singlemode, yellow for OM1, pink for OM2, green for bend-insensitive fibers.

Mechanical Properties: Maximum tensile strength, bend radius, and weight vary by cable type; FRP elements provide fiber protection. Environmental Ratings: Cables are rated for -20°C to +70°C, with indoor and outdoor variants, and water-blocked options for outdoor installations.

Ordering Codes: Example codes follow a structured format indicating fiber count, color, fiber type, jacket type, and optional features like easy strip or tight buffered.

Applications: Suitable for FTTX, LAN/WAN, data centers, broadband, and industrial installations. This table can be expanded or customized based on specific fiber counts, jacket materials, or environmental requirements, and it aligns with catalogues from PAO Tech, OptronicsPlus, and OmniCable for accurate ordering and procurement.
