Fiber Optic patch cord SC-FC dual core

Overview

The bulk cargo of optical fiber equipment can be transported by air or by sea; the whole container can be transported by sea.

Key Takeaways

An SC to FC dual-core fiber optic patch cord is a duplex cable designed for high-performance optical connections, available in singlemode or multimode, with low insertion loss and high return loss.

Overview

An S

C to FC dual-core fiber optic patch cord consists of two optical fibers bundled together, each terminated with an SC connector on one end and an FC connector on the other. These cords are commonly used to connect network devices, switches, routers, and fiber transceivers in fiber optic LANs, telecommunication networks, and FTTH deployments. Dual-core (duplex) cables allow simultaneous bidirectional communication, improving network efficiency.

Fiber Type and Mode

Singlemode (OS2, 9/125 µm): Suitable for long-distance, high-performance communication systems, offering low attenuation and high bandwidth. Multimode (OM1, OM2, OM3, OM4, OM5): Optimized for short- to medium-distance applications, supporting high-bandwidth data transmission.

Connector and End-

Face OptionsSC Connector: Push-pull design, easy to install, widely used in patch panels.

F

C Connector: Screw-on type, provides secure connections, commonly used in high-vibration environments.

End-

Face Polishing: PC, UPC, or APC profiles are available, affecting return loss and signal reflection.

AP

C (angled) connectors provide superior return loss performance.

Cable Construction

Jacket Material: Options include PVC, LSZH (Low Smoke Zero Halogen), OFNR, or OFNP, depending on fire safety and environmental requirements. Durability: High-quality cords use zirconia ceramic ferrules for precise alignment, low insertion loss, and up to 500 mating cycles. Flexibility: Suitable for indoor installations, walls, ceilings, conduits, and data centers, with bend-resistant designs to prevent signal degradation.

Performance Characteristics

Insertion Loss (IL): Typically ≤0. 2 dB for high-quality singlemode duplex cords. Return Loss (RL): ≥60 dB for APC connectors, ensuring minimal signal reflection.

Temperature Stability: Maintains performance across standard operating temperature ranges. Compatibility: Works with standard fiber optic equipment and supports plug-and-play installation.

Applications

Telecommunication networksData centers and enterprise LANsFTTH (Fiber to the Home) deploymentsOptical testing and measurement equipmentCATV and high-speed Ethernet systems In summary, an SC to FC dual-core fiber optic patch cord is a versatile, high-performance solution for connecting optical devices, offering reliable transmission, low loss, and compatibility with both singlemode and multimode networks. Selecting the appropriate fiber type, connector polish, and jacket material ensures optimal performance for your specific application.

Fiber Optic Patch Cord

Fiber optic patch cord is available in both singlemode and multimode versions. Both singlemode and multimode versions fiber optic patch cord come with a zirconia

Multimode Dual Core SC-FC Fiber Optic Patch Cord

The bulk cargo of optical fiber equipment can be transported by air or by sea; the whole container can be transported by sea. The shipping time for conventional

Fiber Optic Patch Cord

Duplex fiber patch cables are constructed with two separate fiber cores and dual connectors at both ends, enabling simultaneous data transmission and reception.

Global Manufacturer & Supplier of SC

Buy SC - SC Fibre Patch Cord at the best price from Norden Communication, the global manufacturer and supplier of electrical and optical solutions. Choose Norden for the worldwide supply of SC - SC

Single Mode Dual Core SC-FC Fiber Optic Patch Cord

Featuring excellent reliability, superior adaptability, and improved security, fiber patch cord has ranked the best choice for applications where conventional copper cables fail to reach.

Value pick: yizhou fiber optic patch cords – lightning-fast data ...

Ship/yizhou lc/sc/fc/st fiber optic pigtail s813 single-core single-mode os2 and multi-mode s817-om3, with a wire diameter of 2.0mm and a moderate length of 1m, are very convenient for
