Fireproof cable tray prices and specifications

Overview

A practical specification guide for choosing fire resistant cable tray systems in commercial and industrial electrical projects.

Key Takeaways

Fireproof cable trays are available in various types such as ladder, solid-bottom, trough, and wire mesh, made from steel, aluminum, or fiberglass, with prices varying by material, size, and fire rating.Types and Specifications

1. Ladder Cable Trays

• Material: Steel, aluminum, or fiberglass

• Design: Open rungs resembling a ladder, ideal for heavy-duty applications

• Fire Resistance: Can meet DIN 4102-12 or E90 standards for 30–90 minutes at high temperatures

• Applications: Industrial plants, power stations, and high-voltage installations

• Features: Excellent ventilation, easy cable installation, supports large cable bundles
2. Solid-Bottom Cable Trays

• Material: Steel or aluminum

• Design: Fully enclosed bottom for complete cable protection

© 2026 ALFA PRO COMMUNICATION SYSTEMS (Pty) Ltd - All rights reserved

• Fire Resistance: Suitable for sensitive cables requiring dust and moisture protection

• Applications: Communication, control, and thermocouple cables in chemical plants, coastal areas, and subway tunnels

• Features: Shields against interference and corrosion, prevents dust ingress 3. Trough Cable Trays

• Material: Stainless steel, aluminum, or composite materials

• Design: Semi-enclosed, combining ventilation and protection

• Fire Resistance: Tested for fireproof performance, often compatible with FP400/FP600 and Draka Firetuf cables

• Applications: Commercial buildings, rail, oil, gas, and petrochemical industries

• Features: Moderate cable protection, customizable lengths, bends, tees, and risers 4. Wire Mesh Cable Trays

• Material: Steel or stainless steel mesh

• Design: Lightweight, open mesh for heat dissipation

• Fire Resistance: Can be used in fire-rated installations with proper intumescent pads

• Applications: Data centers, IT rooms, and areas requiring high ventilation

• Features: Easy to cut and configure, supports complex routing
Accessories and Fireproof Enhancements
• Intumescent Pads and Pillows: Expand during fire to seal gaps in walls, floors, or trunking

• Cable Cleats: Maintain cable integrity and prevent movement during fire

• Covers and Trunking: Fully enclosed designs for dust and moisture protection
Price Range
• Steel Ladder Trays: Approx. $20–$50 per meter depending on width and load capacity

• Aluminum or Stainless Steel Trays: $40–$100 per meter

• Trough and Solid-Bottom Trays: $50–$120 per meter

• Wire Mesh Trays: $25–$60 per meter

• Prices vary based on material, fire rating, size, and supplier ( )
Standards and Fire Ratings
• DIN 4102-12: German standard for fire resistance, tested at 30, 60, and 90 minutes up to 1000°C

• E90: European fire rating indicating 90 minutes of fire resistance

• Compliance: Many trays are tested with specific cable types to ensure fire safety in industrial and commercial installations Fireproof cable trays provide structured, safe, and fire-resistant pathways for electrical and communication cables, ensuring compliance with safety standards while protecting sensitive systems from fire, dust, and moisture.
