

Full-duplex fiber optic patch panel

Overview

Full patching platforms include FX ECX for LAN environments, FX UHD for high-density fiber channels and the DCX System used primarily in data centers where high amounts of fiber connections and density are the key requirements, as in optical distribution frame installations. The 12 Port Fiber Patch Panel Full Solution LC Duplex is a professional-grade fiber optic enclosure designed to simplify fiber termination, splicing, and cable management. Featuring 12 LC Duplex adapter ports in a standard 1U rack-mount design, this enclosure provides secure fiber protection and. Belden offers several Fiber Patching Systems. The panel's shallow depth allows it to be installed within the majority of standard racks and wall-mount enclosures. Foss FP-series front patch panels are made with the highest accuracy for precise fitting.
