Key Takeaways

To install a fiber optic cable on a Huawei H8240, connect the fiber to the ONT, link the ONT to the router via Ethernet, and ensure proper power and LED status. Step 1: Gather Required EquipmentHuawei H8240 router (ONT included if provided by your ISP)Fiber optic cable (SC/APC or SC/UPC connector)Ethernet cable to connect the ONT to the routerPower adapter for the ONT and routerStep 2: Connect the Fiber Optic CableLocate the fiber optic wall outlet where your ISP's fiber line enters your home. Plug one end of the fiber optic cable into the wall outlet.

Connect the other end to the ONT port on the Huawei H8240, typically labeled PON or Fiber. Power on the ONT using the provided adapter and wait 2-5 minutes for the status LEDs to stabilize. Step 3: Connect the ONT to the RouterUse an Ethernet cable to connect the ONT's LAN port to the Huawei H8240's WAN port (or the designated Ethernet port for internet input),.

Power on the router and wait for the Power and PON/Internet LEDs to turn green, indicating a successful connection. Step 4: Verify ConnectionPower LED: Solid green indicates the device is powered on. PON/ONT LED: Solid green indicates the fiber link is active.

LAN LE

DS: Blink when data is transmitted through connected devices. Step 5: Optional Configuration Most Huawei H8240 routers are plug-and-play, with configurations automatically delivered by the ISP's network management system. If manual configuration is needed, access the router's web interface via a browser and verify WAN settings, VLAN ID, or PPPoE credentials as provided by your ISP.

Step 6: Troubleshooting If the PON LED is off or red, check the fiber connection for proper insertion and ensure the cable is not damaged.

If the LAN LE

DS do not blink, verify the Ethernet cable connection between the ONT and router.

Restart the ON

T and router if the connection does not establish after initial setup. Following these steps ensures your Huawei H8240 router is properly connected to a fiber optic network, providing high-speed internet access for home or SOHO environments.
