

How to determine where to buy fiber optic cables

Overview

When to Buy Fiber Optic Cable: Selection Guide for Projects & Networks This fiber optic cable selection guide helps you decide whether now is the right time.

Key Takeaways

You can buy fiber optic cables from major online retailers like Amazon, Walmart, Best Buy, Target, LANshack, Newegg, and Office Depot, offering a wide range of types, lengths, and connectors.

Online Retailers

Amazon: Offers a vast selection of fiber optic cables, including SC/APC, LC, ST connectors, single-mode and multi-mode, armored and standard patch cords, and lengths from 1 meter to 328 feet. Options include both internet/networking cables and digital audio (Toslink) cables for home theater setups (Amazon.com). Walmart: Provides fiber optic duplex and simplex cables, indoor/outdoor spools, and patch cords compatible with major internet providers.

Prices range from a few dollars for short patch cables to hundreds for bulk spools (Walmart.com). Best Buy: Sells fiber optic cables for networking and digital audio, including Toslink optical cables, HDMI fiber optic cables, and LC/SC patch cords. They offer in-store pickup and shipping options (BestBuy.com).

Target: Offers fiber optic cables for networking and home electronics, including SC/APC and LC connectors, with options for same-day delivery or in-store pickup (Target.com).

LA

Nshack: Specializes in fiber optic cables by the foot, with custom lengths, multiple strand counts, and jacket types for indoor, outdoor, armored, and aerial installations. Ideal for enterprise, data center, or telecom projects (LANshack.com). Newegg: Provides a wide range of fiber optic patch cables, duplex and simplex, single-mode and multi-mode, suitable for networking, data centers, and high-speed internet setups (Newegg.com).

Office Depot: Offers fiber optic cables for networking and electronics, including patch cables, breakout cables, and USB active optical cables, with options for online purchase and in-store pickup (OfficeDepot.com).

Tips for Choosing Fiber Optic Cables

Connector Type: Ensure compatibility with your devices (SC, LC, ST, or Toslink for audio). Cable Type: Single-mode for long-distance, multi-mode for shorter distances and higher bandwidth. Length and Jacket: Choose appropriate length and jacket type (indoor, outdoor, armored) for your installation environment.

Bulk vs Patch Cables: For large installations, consider buying bulk cable and cutting to length; for home or small office, pre-terminated patch cables are convenient. By selecting from these retailers, you can find fiber optic cables suitable for home networking, professional audio/video setups, or large-scale enterprise installations.
