

How to make a triple cable management frame and its price

Overview

Shop for electronics, apparel, mobile phones, beauty products & more online from the overseas market at low prices in India.

Key Takeaways

You can build a triple cable management frame using wood or aluminum, cable clips, and a custom frame design, with estimated costs ranging from \$50 to \$200 depending on materials and complexity.

- **Frame Material:** Birch plywood, pine, or aluminum sheets for a sturdy structure .
- **Cable Routing Components:** Cable clips, ties, and channels to separate three sets of cables .
- **Tools:** Miter saw, drill, screwdriver, measuring tape, pencil, sandpaper, and optionally a CNC machine for precise cuts .
- **Optional Finishing:** Paint, varnish, or LED lighting for aesthetics .

Step-by-Step Construction

- **Design the Frame:** Sketch a 3D layout of your frame, ensuring three separate channels or compartments for the cables .
- **Measure and Cut:** Measure the dimensions of your cables and workspace. Cut the frame material to size, leaving space for cable routing and access .
- **Assemble the Frame:** Use screws or brackets to assemble the frame. Ensure each compartment is clearly separated for the three cable groups .

- **Install Cable Management Components:** Attach cable clips or channels inside each compartment to hold cables securely .

- **Finishing Touches:** Sand edges, paint or varnish the frame, and optionally add LED lighting for visibility and style .

Price Estimate

- **Wooden Frame:** \$30-\$80 for plywood or pine, plus \$10-\$20 for screws, clips, and ties.

- **Aluminum Frame (CNC-cut):** \$100-\$200 depending on sheet thickness and CNC service costs .

- **Optional Accessories:** LED strips, paint, or varnish may add \$10-\$30. Total Estimated Cost: \$50-\$200 depending on material choice, complexity, and optional features.

Tips for a Triple Cable Setup

- Label each compartment for easy identification.

- Keep power cables separate from data cables to reduce interference.

- Ensure the frame is accessible for maintenance or adding new cables.

- Consider modular designs if you plan to expand your setup in the future . By following these steps, you can create a functional and visually appealing triple cable management frame tailored to your workspace needs.
