

India Micro-module Production Line

Overview

The new fab, to be located in Dholera, Gujarat, will produce 6-inch GaN microLED and miniLED wafers, and will also produce mini-LED and micro-LED displays. The project's total cost is estimated at 3200 Cr INR (or about \$336 million USD). Last year we reported that India's Ministry of Electronics and IT (MeitY) is considering supporting the construction of a microLED production line in India, or to support the establishment of a supply chain for microLED development and production. The government of India has approved the construction of the country's first factory making miniLED and microLED. The India Semiconductor Mission (ISM) aims to build a strong semiconductor and display ecosystem, positioning India as a global hub for electronics manufacturing and design, while serving as the nodal agency for the efficient and seamless implementation of semiconductor and display schemes. How are solar modules manufactured in India?

Solar modules are produced through cell sorting, stringing, lamination, framing, EL testing, and flash testing under controlled industrial processes.

Crystal Matrix to establish a \$336 million USD microLED epiwafer and ...

Crystal Matrix says it collaborates with Lumens and Soft-Epi for the production technology. For the microLED module (display) production, Crystal Matrix is planning to build an

India's first microLED module factory gets the go-ahead

The planned facility, which will be set up by Hyderabad-based Crystal Matrix Ltd, will have an annual production capacity equivalent to 72,000 sq metres of display panels.

Home | India Semiconductor Mission

The India Semiconductor Mission (ISM) aims to build a strong semiconductor and display ecosystem, positioning India as a global hub for electronics manufacturing and design, while serving

Cabinet approves two more semiconductor manufacturing units with ...

The Union Cabinet chaired by the Prime Minister Shri Narendra Modi approved two more semiconductor projects under India Semiconductor Mission (ISM) which includes country's first

New Semiconductor Fabrication Plants in India 2026

India is currently building 8 semiconductor manufacturing plants across India with significant investment from both domestic and foreign firms. Explore complete details.

Inside a Modern Solar Module Manufacturing Plant in India

See how high-efficiency solar modules are manufactured in India. From cell tabbing to EL testing – full industrial production process explained.

Micron Announces New Semiconductor Assembly and Test Facility in

Micron's new facility will enable assembly and test manufacturing for both DRAM and NAND products and address demand from domestic and international markets. Phased construction

List of Semiconductor Manufacturing Plants in India.

Discover the growing list of semiconductor manufacturing plants in India, including projects by Micron, Tata Group, Adani, and more, driving India's

Module Manufacturing

Tata Power Renewable Energy's module manufacturing process follows a highly automated and precision driven approach to ensure high quality and good efficiency.

India's Rise as a Global Semiconductor Manufacturing Hub

Learn how India is becoming a key player in semiconductor manufacturing with government initiatives, skilled workforce, and growing investment opportunities.

COVER STORY: India's Different Path For Solar Module Manufacturing

COVER STORY: India's Different Path For Solar Module Manufacturing As several Indian solar developers have turned solar module manufacturers, several new companies are also on the

India's semiconductor capacity may reach 80 million

India could produce up to 80 million chips daily as Micron, Tata and other semiconductor plants begin operations, boosting its role in the global chip

Government e Marketplace | National Public Procurement Portal

Government e Marketplace (GeM) is a government-owned procurement portal offering e-bidding, reverse e-auction, and demand aggregation for efficient public procurement.

Market Research Reports & Consulting | Grand View Research, Inc.

Grand View Research provides off the shelf, syndicated market research studies, publishing over 240 reports each year, covering 45 industries, on a global as well as regional level. We track various

India adds 44.2 GW solar modules, 7.5 GW cell

Solar Cell Manufacturing: India added significant solar module and cell manufacturing capacity in the first half of 2025 as per Mercom India's report.

Solar manufacturing in India: Paving the way for a self-reliant ...

As India advances toward its Vision 2047 goals, solar module and cell manufacturing must be at the heart of the renewable energy strategy. While policy interventions like ALMM and

India's chip industry set to hit \$100 billion as global

India's semiconductor market is set to cross \$100 billion by 2030, with mega investments and government support driving chip manufacturing and R&D

Solex Energy Launches India's fastest 800 MW Solar Manufacturing Line -

Surat-based Solex Energy Ltd. announced on Monday that it commissioned an 800-megawatt high-speed production line, marking a significant advancement in the country's solar
