

Inquire about prices for household electrical distribution boxes

Overview

In Conclusion Most residential and commercial electrical systems have at least one distribution box.

Key Takeaways

A standard household electrical distribution box typically costs between \$25 and \$300, depending on size, material, and installation requirements. Typical Price Ranges

- Basic plastic single-gang boxes: \$6–\$25 per unit, suitable for small residential circuits .
- Standard residential breaker panels: \$75–\$300 including labor for installation, depending on amperage and complexity .
- Metal or weatherproof boxes: \$150–\$300 or more, especially for outdoor or upgraded installations .
- Industrial-grade or stainless steel units: Can cost \$1,000–\$2,000, mainly for high-capacity or specialized environments .

Factors Affecting Cost

- Material: Plastic is cheaper, while powder-coated steel or stainless steel offers durability and corrosion resistance .
- Amperage and circuits: Higher amperage panels and more circuit slots increase the price .
- Installation: Labor costs vary by region and complexity; simple replacements may cost \$75–\$150, while upgrades or rewiring can push totals higher .

- Additional features: Smart monitoring, surge protection, and integration with building management systems can increase upfront costs but improve long-term efficiency .

- Environmental rating: Outdoor or weather-resistant boxes carry a premium compared to indoor-rated units .

Buying Options

- Retail stores: Home Depot and similar outlets offer a range of breaker panels and distribution boxes with varying amperage and configurations .

- Online marketplaces: Amazon and specialized suppliers provide pre-assembled power distribution boxes for residential and small commercial use, often with multiple outlet configurations and circuit protection .

Summary

For a typical household, a set of distribution boxes (depending on the number of circuits and rooms) can range from \$100 to \$500 for standard plastic or metal units including installation. For higher-end or outdoor-rated boxes, the cost may exceed \$1,000. Always consider material, amperage, installation, and safety features when budgeting for electrical distribution infrastructure .
