

List of 48-core optical fiber cable models

Overview

48 core optical fiber cable – 48-Core Optical Fiber CableA 48 core optical fiber cable contains exactly 48 individual optical fibers bundled within a singl.

Key Takeaways

48-core optical fiber cables are available in multiple types including OPGW, steel-armored, figure-8 self-supporting, and metallic-armored designs, suitable for high-capacity, long-distance, and harsh-environment deployments.Types and Construction

1. OPGW (Optical Ground Wire) 48-Core Cable OPGW cables combine lightning protection with high-speed optical communication, making them ideal for overhead power transmission lines. They feature a central loose tube surrounded by aluminum-clad steel wires or stainless steel tubes, providing moderate to high tensile strength and corrosion resistance. OPGW cables are customizable in fiber mix (e.g., G.652D + G.655), sheath, and armor layers, and are suitable for smart grid solutions and long-distance data transfer .

2. Steel-Armored OM3 MultiMode Cable HES 48-core steel-armored cables use OM3 50/125 μ multi-mode fibers, offering high bandwidth and long-distance transmission. The steel armor protects against external mechanical damage, while the single-jacketed design simplifies installation. These cables are flame retardant, RoHS compliant, and widely used in data centers, industrial networks, and high-capacity telecom infrastructure .

3. Figure-8 Self-Supporting GYTC8S Cable The 48-core GYTC8S cable is designed for aerial applications with a figure-8 structure. It features loose tubes containing fibers, a central steel-wire strength member, water-blocking materials, and a PE sheath. Corrugated steel tape armor provides crush and impact resistance, making it suitable for outdoor, duct, and buried installations .

4. Metallic-Armored Single-Mode Cable This type of 48-core cable is armored with steel tape and uses single-mode fibers compliant with ITU-T G.652D. It is designed for underground, outdoor, and harsh environments, offering low signal attenuation, high mechanical strength, UV and weather resistance, and flame-retardant jackets. Applications include railways, broadband, FTTH networks, industrial automation, and smart city infrastructure .

Key Features Across Models

- Fiber Count: 48 cores, with options for 24, 36, 72, or 96 cores in some models.
- Mechanical Protection: Steel armor, aluminum-clad steel, or stainless steel tubes for tensile strength and environmental resistance.
- Deployment: Suitable for aerial, underground, duct, and long-distance installations.
- Environmental Resistance: Water-blocking, UV resistance, corrosion resistance, and flame retardancy.
- Applications: Power transmission, telecom, data centers, industrial networks, FTTH, smart grids, and railway signaling.

Summary

48-core optical fiber cables are versatile and available in multiple designs to meet specific deployment needs. OPGW cables are ideal for overhead power lines, steel-armored cables for industrial and high-capacity networks, figure-8 self-supporting cables for aerial installations, and metallic-armored cables for underground or harsh environments. Selection depends on mechanical requirements, environmental conditions, and network performance needs.

48 core optical fiber cable – 48-Core Optical Fiber Cable

A 48 core optical fiber cable contains exactly 48 individual optical fibers bundled within a single protective sheath.

How to Choose the Best 48 Core Fiber Optic Cable for Your Network

Learn what to look for in a 48 core fiber optic cable, from types and specs to pricing and top models. Make an

24 Core and 48 Core Fiber Optic Cable

Fiber optic cable is a cable containing one or multiple optical fibers that are used to transmit the signal. The optical fiber elements are

48 Fiber Cable

We offer a wide range of options, from 6 fibers to 144 fibers, all the way up to 432 fibers and even 6904 fibers, which are Telecordia

48 Fiber Breakout Cables

Each 48 fiber breakout cable contain LC, SC, or ST pre-terminated connectors, as well as Single-mode (OS2) or Multimode (OM1),

OPGW 48 Core Optical Fiber Cable

The OPGW 48-core is almost always the fiber cable of choice for major undertaking ventures where systems protection and

Fiber Optic Cable Catalog

Our easy-payout boxes for Category 5e and Category 6 cables were designed with direct input and feedback from users. Our boxes

Opti-Core Fibre Optic Indoor-Outdoor Armoured Cable 48 to 144

Opti-Core™ Fibre Optic Indoor-Outdoor Armoured Cable 48 to 144-Fibres, EuroClass Cca and B2ca for EMEA A T A S H E E T
