Overview

Metal labels are designed to provide long-lasting identification for distribution boxes, electrical panels, and industrial equipment. They are typically made from anodized aluminum or stainless steel, which ensures resistance to corrosion, abrasion, chemicals, and UV exposure. These labels are suitable for indoor and outdoor use, maintaining legibility even in extreme conditions.

Types and Features

Custom Printed Metal Labels: High-resolution digital printing allows for precise text, logos, and symbols. Protective topcoats enhance durability against wear and environmental damage.
