

New Zealand Telecommunication Tower

Overview

Kordia operates New Zealand's largest network of transmission towers, providing resilient broadcast, FM radio, and critical communications across the country. Following announcements from incumbent MNOs Spark and Vodafone NZ back in February that individual processes to find external capital in tower assets were being explored, both MNOs announced. Looking for reliable, regulation-compliant telecom tower design services across New Zealand?

We specialise in structural and electrical designs for towers supporting broadband, cellular, IoT, and rural communication networks. Explore comprehensive coverage of telecommunications and utilities infrastructure, updated nightly from official sources. Cell tower locations and band details from all major. Wavecom has supplied towers for a range of projects in New Zealand and overseas, starting in 2007 providing 65 medium and high-capacity lattice towers to Vodafone Fiji, then with Phase 1 of the RBI project providing over two-thirds of the newly installed towers, to now recently supplying 40. Telecommunications in New Zealand are fairly typical for an industrialised country. Fixed-line broadband and telephone services were largely provided through copper-based networks, but fibre-based services now represent the majority of connections. Spark New Zealand, One NZ, and 2degrees provide.
