

North African manufacturer selling short-distance optical cables

Overview

NiaFiber Unleash the potential of our premium duct fiber cables, designed for seamless connectivity and long-lasting performance in all Polaris | Algerian.

Key Takeaways

YOA Cables in Egypt is a leading North African manufacturer offering short-distance optical cables, including indoor FTTH solutions.YOA Cables – Egypt

YOA Cables is Africa's largest optical fiber cable manufacturer, headquartered in Egypt, making it a prime North African supplier . They specialize in short-distance optical cables suitable for indoor and local network applications, including FTTH (Fiber to the Home) installations. Their products are designed for easy handling and installation, featuring innovations like Fast Fusion Technology (FFT), which reduces installation complexity and minimizes accidental damage . YOA Cables also provides a range of optical fiber solutions for residential, commercial, and industrial networks.

NiaFiber – Pan-African Focus

NiaFiber offers FTTH indoor cables, which are compact, flexible, and flame-retardant, ideal for short-distance indoor connections within homes or offices . While NiaFiber serves multiple African regions, their products are suitable for North African deployments. They also provide outdoor and duct fiber cables, but for short-distance applications, their indoor FTTH cables are most relevant.

Coleman Wires and Cables – Nigeria

Coleman Wires and Cables, based in Nigeria, is a major African manufacturer with a fiber optic cable plant capable of producing a variety of optical cables . They offer short-distance indoor and local network solutions, although their primary market is West Africa. They may still supply North African projects depending on distribution agreements.

Considerations for Selection

- **Cable Type:** For short-distance applications, FTTH indoor cables or patch cables are recommended.
- **Installation Ease:** Look for manufacturers offering pre-terminated or flexible cables to simplify setup.
- **Local Support:** Choosing a North African manufacturer like YOA Cables ensures faster delivery and regional technical support. For North African projects requiring short-distance optical cables, YOA Cables in Egypt is the most direct and regionally accessible option, with NiaFiber as a secondary choice for specialized indoor FTTH solutions .
