

Price list for 96-core optical fiber cable

Overview

96 Core Fiber Optic Cable Price ListDiscover 96 core fiber optic cable price list with G652D single mode, PE sheath, and CE/ISO9001 certification for aeria.

Key Takeaways

96-core optical fiber cables typically range from \$0. 09 to \$6 per foot depending on fiber type, construction, and purchase volume.

Price Overview

Wholesale bulk pricing: \$0. 09 to \$1. 52 per foot for 96-core cables, depending on fiber type and construction.

Retail pricing: \$1 to \$6 per foot, with higher costs for pre-terminated assemblies or armored cables. Single-mode fiber (G. 652D): Generally lower cost per foot than multimode fiber, suitable for long-distance outdoor or campus backbone applications.

Multimode fiber (OM3/OM4): Slightly higher per-foot cost, optimized for shorter-distance high-speed data transmission.

Factors Affecting Pricing

Cable Construction: Armored cables: \$0. 50 to \$5 per foot, suitable for harsh environments or rodent-prone areas. Loose-tube outdoor cables: Standard for outdoor installations, moderate pricing.

ADS

S (Aerial) cables: Designed for aerial deployment, pricing varies with span length and material. Installation Type: Underground or direct-burial installations increase overall cost. Aerial or indoor runs are generally less expensive.

Supplier and Order Volume: Minimum order quantities (MOQs) range from 1 km to 200 km. Bulk orders often receive tiered pricing discounts (e.g., 1–9 km, 10–99 km, 100+ km) to reduce per-foot cost. Sourcing directly from OEM factory distributors can provide better pricing and customization options.

Certifications and Standards: Ensure compliance with IEC, ITU, UL, RoHS, and CE/ISO9001 certifications for quality and safety.

Example Price Tiers

Fiber Type	Construction	Approx. Price per Foot	Notes
Single-mode G. 652	DPE sheath, outdoor	\$0.	

10–30	\$0.50–\$1.	Standard long-distance telecom	Multimode OM3/OM4 Armored, outdoor
-------	-------------	--------------------------------	------------------------------------

00	High-speed LAN or data center	96-core pre-terminated	Armored or loose-tube
\$1–\$6	Includes connectors, ready for deployment	Recommendations	

Compare multiple suppliers: Look for repeat buyer rates above 30% to ensure reliability. Consider total cost of ownership: Factor in installation, maintenance, and lifespan (20–30 years for fiber networks) rather than just material cost. Request verified quotes: For precise budgeting, contact suppliers directly for bulk pricing and customization options.

By evaluating these factors, you can select a 96-core optical fiber cable that balances cost, performance, and long-term reliability.
