

Price of 100-400 cable trays

Overview

Shop high-quality cable tray 400 mm from reliable suppliers. Find durable, anti-corrosion materials for indoor and outdoor use. Perfect for data centers and buildings.

Key Takeaways

The price of 400 mm wide cable trays varies by type and material, typically ranging from \$50 to \$150 per 2. 4-meter section for hot-dip galvanized steel ladder trays.

Pricing Overview

Material and Type Influence Cost: Hot-dip galvanized steel ladder trays are commonly used in industrial and commercial installations. Prices for a standard 2. 4-meter length typically range from \$50 to \$150 per tray, depending on load capacity and supplier.

Perforated trays and solid-bottom trays may cost slightly more due to additional manufacturing complexity and ventilation or support features. Fiber-reinforced plastic (GRP) trays or specialized coated trays can be higher, reflecting corrosion resistance and durability. **Tray Dimensions:** A 400 mm wide tray is standard for medium to heavy cable loads.

The height or depth (e.g., 400 mm) affects the load capacity and may slightly increase the price. **Additional Costs:** Fittings and accessories (elbows, tees, reducers, supports) are priced per piece and can add to the total system cost. Installation and labor are not included in the tray price but should be considered for budgeting.

Applications: These trays are widely used in industrial facilities, commercial buildings, data centers, and infrastructure projects where organized cable management and heat dissipation are critical. Summary: For a 400/400 mm hot-dip galvanized steel ladder tray, expect \$50-\$150 per 2. 4-meter section, with higher prices for perforated, solid, or GRP trays.

Accessories and installation costs are additional and vary by project requirements.
