

Price of 6-meter overhead cable tray

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. For bulk orders or project pricing, the cost can be significantly lower. Cable trays are vital in electrical installations, providing secure pathways for power, communication, and control cables across residential, commercial, and industrial settings. These cable trays are lined with wire mesh to route and support small diameter cable, such as data communication cable. The rungs allow cable to enter and exit anywhere along the span, and they facilitate future changes. Cable trays will tend to be significantly less expensive to use in 2026 than metal pipes due to their faster installation.

2 Why is Conduit So Expensive?
