

Price of Dual-Core Butterfly Optical Cable

Overview

2 core butterfly optic cable Find wholesale 2 core butterfly optic cable, data communication cable, and much more at Alibaba.com. Buy communication cables.

Key Takeaways

The price of a 2-core butterfly optical cable typically ranges from \$0.50 to \$2.50 per meter, depending on specifications and supplier.

A 2-core butterfly optical cable, also known as a figure-8 or lead-in cable, is designed for indoor FTTH installations. It features two parallel FRP or steel reinforcement members on either side of the optical fiber, with a PVC or LSZH sheath for flame retardancy and environmental safety. These cables are lightweight, flexible, and suitable for direct indoor wiring or building entry points.

Factors Affecting Price

- **Fiber Type:** Single-mode (G657A1) is more common and slightly cheaper than multi-mode fibers.
- **Sheath Material:** LSZH (low smoke, halogen-free) is more expensive than standard PVC due to safety and environmental compliance.
- **Reinforcement Material:** Steel-reinforced cables are generally more expensive than FRP-only versions because of higher tensile strength.
- **Length and Supplier:** Bulk purchases from manufacturers or wholesalers (e.g., Alibaba or Made-in-China) can reduce the per-meter cost.

Typical Price Range

- **Low-end:** \$0.50-\$1.00 per meter for basic indoor PVC-sheathed, FRP-reinforced single-mode cables.

- Mid-range: \$1.00-\$1.80 per meter for LSZH-sheathed, FRP or steel-reinforced cables.
 - High-end: \$2.00-\$2.50 per meter for premium single-mode G657A1 cables with steel reinforcement and LSZH sheath, suitable for professional FTTH installations .
- Purchasing Tips
- Verify the fiber type and reinforcement material to match your installation needs.
 - Check if the supplier offers pre-connectorized or field-terminable options, which can affect installation cost.
 - Consider shipping and import fees if ordering internationally, as these can significantly impact the total cost. By comparing suppliers and specifications, you can select a 2-core butterfly optical cable that balances performance, safety, and cost for your FTTH or indoor telecom project .
