

Price of Pultruded Fiberglass Cable Trays

Overview

FRP Pultrusion Cable Trays Shop high-quality FRP pultrusion cable trays for durable and efficient cable management. Fiberglass reinforced plastic for vario.

Key Takeaways

Pultruded fiberglass (FRP) cable trays typically range from \$20 to \$150 per foot, depending on type, size, and resin system.

Typical Pricing

Pultruded fiberglass cable trays are available in various types, including ladder, solid-bottom, trough, and perforated designs. Prices generally vary based on: Tray type and size: Ladder trays are often less expensive than solid-bottom trays due to material usage and manufacturing complexity. Width, depth, and load capacity also influence cost.

Resin system: Polyester resin trays are usually more affordable, while vinylester resin trays, which offer higher chemical and corrosion resistance, are priced higher.

Customization and accessories: Bends, tees, risers, and dividers can increase the overall cost. On platforms like Alibaba, fiberglass cable trays are listed with prices starting around \$20-\$50 per foot for standard sizes, while heavy-duty or specialized trays can reach \$100-\$150 per foot depending on specifications and shipping requirements.

M

P Husky and Creative Composites Group highlight that pultruded FRP trays are lightweight yet strong, corrosion-resistant, and suitable for harsh environments, which can justify higher upfront costs but reduce long-term maintenance expenses.

Cost Considerations

Durability and lifespan: FRP trays resist corrosion, UV exposure, and chemical attack, which can lower lifecycle costs compared to steel or aluminum trays. **Installation efficiency:** Lightweight trays reduce labor and transportation costs. **Compliance and certifications:** Trays meeting ASTM standards or flame ratings may carry a premium.

For precise pricing, it is recommended to request a quote from suppliers based on your project's tray type, dimensions, resin system, and quantity, as bulk orders often receive discounts. In summary, while the base price of pultruded fiberglass cable trays ranges from \$20 to \$150 per foot, the final cost depends on material, design, and project-specific requirements, with FRP offering long-term durability and reduced maintenance costs.
