

Price of construction site charging boxes and distribution boxes

Overview

Discover efficient construction site power distribution box solutions designed for optimal power distribution. Enhance your operations with reliable, durable equipment tailored to your needs.

Key Takeaways

Charging distribution boxes for construction sites typically range from a few hundred to several thousand dollars, depending on capacity, type, and rental or purchase options.

Purchase Costs

The cost of a distribution box depends on specifications such as voltage rating, amperage capacity, number of circuits, material, and safety features. Standard residential or light-duty units may cost a few hundred dollars, while commercial or industrial-grade boxes designed for heavy-duty applications can reach several thousand dollars due to higher durability, multiple circuits, and advanced monitoring features (Sunnom). Outdoor-rated, weather-resistant enclosures or units with smart load management capabilities generally carry a premium price (Sunnom).

Rental Options

For temporary use at construction sites, mobile EV charging distribution boxes can be rented. For example, a Type 2 mobile charging station with 32A 3-phase capacity and two simultaneous charging connections is available for hire, with pricing based on daily or weekly rates. Additional costs may include transport, maintenance, cleaning, accessories, and surcharges for damage or theft.

Weekend rates and extra operating hours may also apply (Boels). Rental is often restricted to businesses with a customer account.

Installation and Operational Costs

Beyond the hardware, installation costs can significantly affect the total budget. For commercial EV charging setups, costs include electrical wiring, panel upgrades, permits, and labor. Modular designs and smart load management can reduce installation time and labor by 10-20% per unit, and allow multiple chargers to share a single circuit, lowering overall electrical costs (ChargeTronix).

These factors are particularly relevant for construction sites where temporary or scalable setups are needed.

Summary

Purchase price: \$200-\$3,000+ depending on capacity and features (Sunnom). Rental price: Daily or weekly rates, with additional costs for transport, maintenance, and surcharges (Boels). Installation/operational costs: Vary based on site conditions, labor, and electrical upgrades; modular and smart systems can reduce costs (ChargeTronix).

Choosing between purchase and rental depends on the duration of use, site requirements, and budget. For short-term construction projects, renting a mobile distribution box is often more cost-effective, while permanent installations may justify purchasing a higher-capacity unit.

Construction site electrical enclosure

Find your construction site electrical enclosure easily amongst the 25 products from the leading brands (BIO-UV, YSCABINET, ERLO, ...) on DirectIndustry, the

Construction site power distribution box

Discover efficient construction site power distribution box solutions designed for optimal power distribution. Enhance your operations with reliable, durable equipment tailored to your needs.

Site enclosures

The construction site enclosures are robust devices designed to distribute and secure electrical power on construction sites. Available from domeashop , these enclosures guarantee safe, reliable

Power Distribution Box, 110V Electricity Meter Electrical Box ...

Our metal boxes, distribution boxes, disconnectors, junction boxes and other electrical products can meet your needs; We focus on durability, ease of use and professional service.

Construction Distribution Board

Discover construction distribution boards with IP44 waterproof rating—ideal for site power management. CE certified for safety and reliability.

Site Power Distribution Box Market Research Report 2034

The site power distribution box market is valued at \$4.2 billion in 2025 and is projected to grow to \$7.1 billion by 2034, representing a compound annual growth rate (CAGR) of 6.3%.

Wholesale Power Distribution Boxes from Manufacturers, Power ...

Dive into our online wholesale power distribution boxes products catalog on globalsources ! Source over 58 power distribution boxes for sale from manufacturers with factory direct prices, high quality &

Site Boxes IP44 IK09 Single-Phase and Three-Phase

Each site box is selected to guarantee a secure temporary installation, efficient energy distribution and simple implementation. Browse our online offers to discover the available models and optimise your

Power Distribution & Supply For Construction Sites

Portable & temporary construction site power distribution, supplies & electrical products, including transformers, plugs, cables & sockets. Get next day delivery to your site.

Site Boxes IP44 IK09 Single-Phase and Three-Phase

Site Boxes On a construction site, temporary power supply determines the safety of the entire team and the continuity of work. The site box is the central element of temporary electrical distribution: it

Power distribution boxes - safe site power distribution | Modipro

Power distribution boxes Power distribution boxes are robust and reliable solutions for safely distributing electrical power on construction sites, in workshops and temporary installations. Whether you need
