

Price of galvanized cable trays in Belgium

Overview

Galvanised Cable Tray In Belgium
Cost-effective: Galvanised Cable Tray is often a cost-effective solution compared to other materials. It is relatively affo.

Key Takeaways

Galvanized cable trays in Belgium typically range from €15 to €50 per meter, depending on size, type, and supplier.

Overview

Galvanized cable trays are steel trays coated with zinc to resist rust and corrosion, making them ideal for industrial, commercial, and residential electrical installations. They are available in various forms, including ladder trays, perforated trays, and mesh trays, each suited for different cable management needs. The price depends on factors such as tray width, height, thickness, and perforation type.

Typical Price Range

Small perforated or mesh trays (100-200 mm width): €15-€25 per meter
Medium ladder or solid trays (200-400 mm width): €25-€35 per meter
Large heavy-duty trays (400 mm+ width or industrial grade): €35-€50 per meter
Custom sizes, special coatings, or pre-fabricated bends and accessories may increase the cost. Suppliers like Delaby Electro and Trayco offer tailored solutions and can provide quotes based on project requirements.

Additional Considerations

Durability: Hot-dip galvanized trays provide long-term corrosion resistance, suitable for harsh environments. **Installation:** Perforated and mesh trays allow better ventilation and easier cable management, potentially reducing labor costs. **Supplier Quotes:** For precise pricing, it is recommended to contact local suppliers directly, as prices can vary with order volume, delivery, and customization.

By considering these factors, you can select the appropriate galvanized cable tray for your project while staying within budget.
